**Gives Talk At Smoker**

Speech Compares Gold And Oil In California

Professor Waldemar Lindgren of the department of Geology spoke at smoker of the Geological Society of America, held Tuesday in the Walker North Hall.

The subject of his talk was the mineral resources of California. He made a comparison between the two principal products of California—gold and petroleum. Summarizing the history of both substances, he showed how the value of petroleum has increased until it far exceeds that of the gold mined.

Professor Harvey W. Sinclair, head of the department of Geology and geology faculty of the society, made arrangements for the smoker.

**DO AMERICANS FLIERS APPRECIATE THE COSTLIER TOBACCO IN CAMELS?**

YEAH they do! In aviation is one of the most discriminating groups of smokers in the country. Famous record holders, Col. Roscoe Turner, smokes Camels. So does one pilot, Mr. Lee Colles, Capt. Frank Hawkes, Capt. Ray Elmore, and many other of the world’s great fliers.

And from what I see, most fliers share my regard for Camels. They need healthy nerves. That’s one big reason why so many of us stick to Camels.
