Dormitory Dance Committee Raises Attendance Limit

Tickets Almost All Sold Out After Four Days

Prof. A. A. Schafer To Speak

An almost complete sell-out was reported yesterday by the dormitory dance committee for the eighth annual dormitory dance. This is after only three days of dorm sales and one day of sales in the main lobby.

The original limit for the dance was set at one hundred sixty couples, but because of the large demand the committee was forced to raise the limit to two hundred fifty. All tables on the main floor are already taken and most of these on the balcony. The ticket sales in the main lobby continue for three or four more days.

Professor Albert A. Schafer of the department of engineering at MIT, was invited by the dormitory committee to address the added feature of a two-thirty A.M. breakfast.

The music will be furnished by the Residence Committee under the direction of Robert Stone, '39, chairman; and Leo McKeever, '39, vice chairman; and Thomas W. Kolb, '39; Franklin S. Atwater, '38; and Bernard W. Mehrens, '38.

Doctor L. B. Andrews Talks to Graduates on Modern Use of Radio

W1 XAL Program Director Tells Possibilities in Radio

"Educational Broadcasting in America and England" was the subject of a discussion by Dr. L. B. Andrews, the Graduate House Dinner in Walker Memorial Wednesday evening. Dr. Andrews is the director of the W1 XAL educational radio station.

Dr. Andrews is program director of the station which was originally started by experiment over Boston's short wave stations W1 XAL and W1XBJ, three months of last year in England, studying the possible results of educational radio. He has been doing such work for ten years. Dr. Andrews studied the high quality programs of the British system and the results of his study was the development of W1 XAL.

Non-commercial stations in this country, such as W1 XAL and several others connected with student universities, have been struggling to fill this gap by providing programs of definite educational value and wide cultural breadth.

Dorm Men to Install Condensers On Razors

Every dorm room using an elec- tric razor after February 1st will have condensers installed to prevent electric outlet with the razor, according to the dormitory dance committee.

The plans passed after considerable research by a special committee, headed by the dormitory dance committee. It is estimated, according to this group, the use of condensers will save the dormitories from underhale, and will be enforced by the chairman of each floor.

Agenda. Sophomore honorary so- cieties will be invited to the formal meeting of the dormitory residents. A representative committee of the dormitories for electric razors then found that the dormitory dance committee had no power to order them to install condensers, costing from 15 to 25 cents each. The use of condensers was therefore abandoned, and the plan was to install the noise followers at the source. The meetings will be directed effectively after this term ends.

Statistics Fiend Goes On Rampage

With Architecture Building Figures

The second floor of the Architecture Building was the scene of a fiendish fiend, who took over a group of statistics figures from the room of the building. The contractor, Stone and Webster, was responsible only for the original figures in the room.

The new building on Massachusetts Avenue will have all the electrical condensers in concrete it in when completed. Paced out 120 square beer cans, this will total 12,000,000 of them.

Assuming a height of 6 inches per con- denser, they would stretch 1,600 if laid and end, which would reach well beyond Chicago if one were laid end to end. Only it is suggested that it might be better to kill all of the beer cans in Boston. Distributed at Technology, each student would have 6,000 of these condensers.

Not Many Bricks in Building

Application is not as much brick in the building as concrete. The 307,000 square feet of new building will be made of 340,000 bricks, 5,000 of them. That is the way to New York, making it a few years to get the road for the rest of the way.

But in volume the building is im- mense. 2,700,000 cubic feet of concrete is planned, one square foot per student. Only it is suggested that if the concrete is going to be laid, the building should be laid with the # concrete as it is laid.

Books are the classical

Dr. Copeland Talks To A.I.Ch.E.

Copies Of Oct. 18, 1937

The subject of the discussion will be: "What Are the Proper Limits of Federal Regulation of Business?" Both men are particularly well quali- fied to discuss this timely question because of their connections with the government in this area. Eliot will present the main administration in its policy of regulation of private business. Mr. Eliot will present one legation which leads to the restric- tion of private enterprise.

This question of governmental pol- icy should be especially interesting to the public at this time in view of the President's last message to Con- gress. Other current issues of the day such as the Social Security Act and the TWA will undoubtedly play a prominent part in the debate.

The Tech, room 301, Walker Mem- orial, is the place of meeting. The meeting is open to students interested in the subject. The discussion will close with a dinner at Hotel Myles Standish. At the same time Robert V. Smith, '39, was the Editor-in-Chief and Paul M. For- mer, '39, was the Editor of "The Progress." His talk was concerned with how he built the magazine up into the publication it is today.

Dramashop Tryouts Set For Next Week

Applicants Not To Be Limited To Shakespeare

To Determine Ability

Dramashop will hold its last regu- lar auditions next Monday and Tuesday at 5 o'clock in room 10-250. Anyone desiring to be a- member this school year must be enrolled in this course.

Applicants will be asked to read a passage from any play, that is, their voice and acting abilities will be judged, not the only factor that is concerned. The determination of the plays has a large part in their of- ferers who are accepted will become mem- bers immediately after the try-out.

The spring play is being considered by a committee of instructors to be a serious production and from underhale, and will be performed by the chairman of each floor.

Agenda. Sophomore honorary so- cieties will be invited to the formal meeting of the dormitory residents. A representative committee of the dormitories for electric razors then found that the dormitory dance committee had no power to order them to install condensers, costing from 15 to 25 cents each. The use of condensers was therefore abandoned, and the plan was to install the noise followers at the source. The meetings will be directed effectively after this term ends.

Musical Clubs to Give Concert With Bouve

A joint concert with the Combined Glee and Dramashop will be given in the Boston Bee School of Physical Culture and Dramashop and Bouve at 8 P.M. This evening.

Members will be presented by the Glee Club, Orchestra, Oratorio Society, and Dramashop. The combined forces of both schools will sing several num- bers in this concert.

A dance will be held after the pro- gram. Tickets will be sold at the door for ten cents each, and the fund will go to the one- tided year with Bouve.

Business Policies Subject Of Talk

Ex-Governor Of Massachusetts

And Former N.S.A.C. Corp. Chairman

The former Governor of Massachu- setts, Joseph B. Ely, and the former president of the National Social Security Board, Thomas R. Elliott, will be the speakers at the Technology Open Forum in Eastman Hall on Tuesday, January 15.

The subject of the discussion will be: "What Are the Proper Limits of Federal Regulation of Business?" Both men are particularly well quali- fied to discuss this timely question because of their connections with the government in this area. Eliot will present the main administration in its policy of regulation of private business. Mr. Eliot will present one legation which leads to the restric- tion of private enterprise.

This question of governmental pol- icy should be especially interesting to the public at this time in view of the President's last message to Con- gress. Other current issues of the day such as the Social Security Act and the TWA will undoubtedly play a prominent part in the debate.

Ten Cents Offered For Book Copies Of Oct. 18 The Tech

Tens dollars will be paid for copies of volume 37. No. 36 of The Tech. The due date is October 18, 1937. Any one wishing to turn in such copies, do so at the Business Office of The Tech, room 361, Walker Memorial.

Photography Courses Offered By Y.M.C.A.

One Course For Beginners, One For Advanced Students

Two courses in photography, one for beginners and one for advanced students are being offered by the Boston Y. M. C. A. starting next week.

Two courses in photography, one in a series of eight weekly meetings. Among those participating in the teaching of the courses are Mr. John Shetrick, Photographer, St. John's University, for the beginners' course; and Norman A. Masson, Arthur Hammond and Franklin J. Jordan, Associate Edi- tor of "American Photography," for the advanced course.

The courses will be conducted in a series of eight weekly meetings. Each class is expected to bring a camera to the classes. The Omaha Improvement Movement. The members of both the transmission and the reel coil resistances were used by Mr. Johnson in his talk.

Buick Engineer Talks At Meeting of S.A.E.

Mr. Frank E. H. Johnson, of the Buick Company, was the guest speaker of the Society of Automobile Engineers last evening at the Hotel St. Regis. At the same time Robert V. Smith, '39, was the Editor-in-Chief and Paul M. For- mer, '39, was the Editor of "The Progress." His talk was concerned with how he built the magazine up into the publication it is today.

Dean Rector reports that the tele- phone extension to all dormitories is complete except for the main floor which is now underhale, and will be completed immediately.
