Dorm Dinner Dance
Complete Sellout; All Tables Filled

Speecbes Followed By Dancing To Raymond Compton's Orchestra

Dr. Compton Says Few Words

Every table filled, the Dorm Dinner Dance was given Friday night in Walker Memorial and his orchestra supplied the music. The sellout of tickets followed a pre-arranged policy for such events, established to ensure that the dormitories never become overcrowded.

Coed's Club Gains Institute Approval

Association Will Try To Obtain Suitable Housing For Girls

Elections for officers were held by the newly-formed Association of Women Students at M.I.T. at the last meeting of the club, which was organized "to provide a homelike atmosphere of coeducation, and to give the female students a more intimate relationship with the other groups." The Coed's Club, sponsored by the Harvard Alumni Association, is open to jurisdiction of the Central Library. It will elect its librarian, Library work of the club members will be supervised by Dr. Compton for second term, and will continue through the year.

New $37,500 Library Coordinates Six Departments

Six departments share the new sections of the library, in addition to the group of facet libraries which is being continued. The new library coordinates two different Libraries, the Social Science Library and the Law Library, under the direction of the Central Library.

The courses represented are civil engineering, chemical engineering, mechanical engineering, naval architecture, physics, and several classes in the industrial relations section. The courses include the study of economics, taxation, and public administration, and classes in the international relations section.

Dr. Compton to Talk At 5:15 Club Smoker

Prof. Compton, chairman of the Department of Physics, will speak on the subject "Progress of Science" to the Sigma Xi Club Thursday at 8:30 P.M., in room 2260.

The lecture, sponsored by the Sigma Xi Engineering Society, is open to all students.

Dr. Hardy said that his talk will deal with the general problem of the development of modern science, the development of various processes from the days of Galileo to the present day. He added that he believes the methods are outgrowths of the original methods, and that the problem of progress is to include discussions of both the stil-in-motion picture photography.

Dr. Hardy to Talk on Film Photography

Professor Arthur C. Hardy, of the Department of Physics, will speak on the subject "Progress of Science" to the Sigma Xi Club Thursday at 8:30 P.M., in room 2260.

The lecture, sponsored by the Sigma Xi Engineering Society, is open to all students.
