Letters to the Editor

President of the Institute Committee

To the Editor:

I am an editorial in your issue of February 18, relative to the loss by the Senior Class of recognition on the Institute Committee, you stated: "The Senior Class is lost out...and logically, since he holds his portfolio by virtue of his being head of the Senior Class, the President of the Committee also." This is a quote from the Committee minutes. I would like to correct the record. The accrediting of the various institutes is not done by the Returned Officers. The Chamberlain of the institute accepts the recommendations of the committee. In short, my position on the Institute Committee is that of a dual nature, and the authorship for it comes from two distinct conditions, either of which is sufficient to rank it in its own right. My responsibilities of representing the Senior Class by voting (which I have never exercised) is in force, but my other privileges and duties are unaffected. This information may be found in the T.C.A. Handbook, which is available to the Editor of The Tech.

I vouch that it is not merely in favor of concrete evidence rather than hearsay or "logic" that I am fling for judicial decision by the Institute Committee...

The outgoing officers plan to meet with their successors in the spring for the purpose of selecting the remainder of the organization's cabinet.

It was announced also at the meeting that Professor F. A. Maguire of the Department of Humanities will deliver a series of lectures on economics sponsored by the T. C. A. The first lecture will be given in April.

CONGRATULATIONS FRESHMEN

Class of '41:

We extend our sincere congratulations to all of you who have weathered the storms of the first term. True, your faces have been chilled. Technology is the place where only the strongest survive.

But we take our hats off to those among you who have done more than just study, those who have run with Oscar Holdorf, boxed with Tommy Rawson, or otherwise contributed their brains to Institute athletics, even if it was only to escape P. T., and those who have put themselves into one of these new clubs, or otherwise contributed their brawn to Technology activities.

To our own staff, who have worked and "bullied" with us, we owe a greater measure of appreciation.

But all freshmen do not enter into the spirit of Institute Life. To you we offer a chance to become acquainted with our paper.

In the near future we are planning a serial article on the purpose of introducing new men to our present active staff. We are interested in becoming one of these new men, leave your name with the secretary of the office staff, or get in touch with some member of the staff immediately. There are opportunities in every department.

Come out of your shell and meet the gang!
