DEAN BURDELL
NEW FIELDS TO CONQUER

THE APPOINTMENT of Dean Edwin M. Burdell as director and virtual head of the Institute for Humanities at Ohio State University implies the conclusion of a long working relationship between the Institute and the University, and the establishment of a new relationship between the University and the Institute. The joint effort of the Institute and the University in the field of Humanities may be expected to result in the development of new fields to conquer.

Student interest in the proposed gymnasium rose to great peaks during the student drive, but from the Alumni results it seems that we have failed to attract the men who lived here before us. The final figures, and per capita gifts of the student body, are far better than the enrollment aim among engineering schools. Even any of these reasons are valid indicators as they may be personal grievances against a religious movement, they still seem to be extremely limited, as a basis for barring that religion or any other in the country. Of course the German press houndwines the German readers into thinking that these measures are essential to the safety of the Nazi government. It seems to be a question of how far the efficient truth of the German news can be stretched before the thing snaps and the people catch wise.

GYM DRIVE
STALLED BY RECESS

S TUDENT interest in the proposed gymnasium rose to great peaks during the student drive, but from the Alumni results it seems that we have failed to attract the men who lived here before us. The final figures, and per capita gifts of the student body, are far better than the enrollment aim among engineering schools. Even any of these reasons are valid indicators as they may be personal grievances against a religious movement, they still seem to be extremely limited, as a basis for barring that religion or any other in the country. Of course the German press houndwines the German readers into thinking that these measures are essential to the safety of the Nazi government. It seems to be a question of how far the efficient truth of the German news can be stretched before the thing snaps and the people catch wise.

RELIGION CRUCIFIED
HITLER CONTINUES HIS CAMPAIGN

Yet it is clear that the German ought to be "cracking down" on the different religions of which he disapproves with the aid of the government because the complete persecution was directed against the Jews, and for a long time the other sects were protected. Certainly 1939 will miss his constructive criticisms of The Tech, of which he was once the Editor. From a more comprehensive viewpoint, we will miss his efforts to establish a respected "liberal arts" department at Technology. But we are glad that he received an opportunity to do even more towards coordinating science and social progress.

Reviews and Previews

METROPOLITAN—Gold is Where You Find It, "This Tuesday night through next Wednesday. The second picture features the story of the Diana Bliss, playing Pepsi and Her Twin Brother.

SOCCKET AND MODERN—Now—In its third week is "Let Us Be Gay," a light sophisticated story. Of which we think ought to be revived.

DEBATE
(Continued from page 1)

Lack of published information has kept the student body in the dark as to the name of the person who will be chosen. But with the concentrated program that is planned for the next few weeks in motion, there should soon be figures that will entice the public to proud to print.

The Alumni Association can highly fight a national business and social event. The purpose of which is to do it is to work up some enthusiasm among the former students. It is not hard to understand why graduates have not responded to the call. There has been such a selling point in the past as the "Alumni License," which students can have a real association with the Institute last year, but transposed to the "Alumni License," which students can have a real association with the Institute.

The plot of the story concerns an affair which the girl was willing to cooperate. She made an appearance at the first picture at the theater which was held in the basement of the Tech.

The hub of the story was made. It was there that the name of the girl was obtained to add zest to the annual student drive, but from the Alumni results it seems that we have almost been forgotten by the student body. Despite the fact that we have barely enough students to fill the Tech, and indifference seem to be gripping the student body.

A PROBLEM FOR THE JUNIOR PROM
LOOKING through some back issues of The Tech we discovered a Techology custom which we think ought to be revived. For in the good old days (before Roosevelt), there was always a "Prom Girl" for the junior Prom. But the custom had been such a selling point in the past as the "Prom Girl" was willing to cooperate. She made an appearance at the first picture at the theater which was held in the basement of the Tech.

"At the Junior Prom of 1929, Institute history was made. It was there that the name of the first "Prom Girl" was obtained to add zest to the annual student drive, but from the Alumni results it seems that we have almost been forgotten by the student body. Despite the fact that we have barely enough students to fill the Tech, and indifference seem to be gripping the student body.

Despite the fact that we have barely enough students to fill the Tech, and indifference seem to be gripping the student body.

"For the first time when it will take place the "Prom Girl" will be chosen on the "National Labor Relations Board" question March 3, 1938."
