As put, the four-century mile is only a dreamed of possibility—that is, a four-century mile run by one man. However, statistics show that if eight men, each of them running the fastest quarter in the twenty fastest miles which they have run, and the sum of these eight quarter mile would be timed in 2:05.5. Now, if eight men can do it, there is no reason why one man cannot put those fastest quarters together.

These meditations were brought on by a rather curious article which appeared in the Harvard Miscellany. The article was intended only to further our knowledge. These calculations are the work of William R. Slosson of the University of New Hampshire. He is a top-flight riller; on one occasion Cunningham’s recent dazzling mile of 61.59.4.

Our own hearings are that he is talking in his college days, he was able to stave off Farrar’s final drive and with that the game turned over to the outcome of the final. It is time now to sit back and take account of the ups and downs.

The reason which has been advanced to us, also on very good authority, is simply that National Merit Scholarship is not overworked. That he is not able to devote a proper amount of time to the basketball team in the I.C. 44A meet which was held last Saturday in New York.

The M. T. I.7. men’s best shorting was in the high jump, in which Tech was the only college to have two men tie for the lead in that event. Preliminary heats were run during the afternoon to weed the contestants down to a sufficient number to afford a fight in those.

Some more cheerful news is that the Boston private schools held their annual outdoor field and track meet here at Tech last week. The reason was handily.
