supply the necessary curriculum and environment that will draw out the desired talents. Each school has its own conclusion and worked out a system. For more interdepartmental and scientific thought, we believe we have the correct solution, and it is up to the faculty to apply our tried and proven method to this new crop of eager students.

Our system follows logically from the conclusion that many should not be taught to think, but their ability to think can be rapidly increased through practice. Our examinations therefore are aimed toward taxing one's power to figure out solutions originally, not toward taxing one's memory. As many problems as possible are designed to be new and original so that the student must construct his answer rather than remember it.

New men are sure to be surprised by this procedure, and it is those who can accommodate themselves to this system who will graduate and obtain the success each one of us strives for. It is impossible to guarantee that our graduates will mature, but they have been in the past and providing the faculty keeps our method of training in view through the years to follow, we may look forward to an easy four year path to maturity.

CONSCIENTIOUS OBJECTORS MAY BE EXCUSED FROM R.O.T.C.

Tucked away in a corner of the school catalogue, the freshmen may find an announcement with regard to compulsory R.O.T.C. Briefly, this article states that students who are conscientious objectors may substitute courses in international law and government for the military science training.

In the past R.O.T.C. has been one of the most constant supports for the move towards voluntary R.O.T.C. Institute. Because this voluntary training for conscientious objectors has been achieved only recently and because it is thus not a well known feature of military education here, we make mention of it.

We hope that those freshmen and sophomores who are sincerely and staunchly opposed to violent conflict will not hesitate to exercise their rights at the Institute in regard to R.O.T.C. We do not believe that such action will hinder the objector's chances for scholarship and loan aid from the Institute. If it does, then the objector must consider that the school is not the place for him. Our system follows logically from the conclusion that men therefore are aimed toward taxing one's thought, we believe we have the correct solution, and it is up to the faculty to apply our tried and proven method to this new crop of eager students.

OUR PLACE IN INSTITUTE ACTIVITIES

With the advent of the publications and other activity smokers next week, the freshmen will have an opportunity to affect the entire course of their schooling here. For all the new men and particularly for those who have spent an entirely new environment, the choice of an activity will determine the aspect of the entire rest of his school life. The student at Technology develops a one-sided personality; too often he is promised, of shapely, talented young swimmers. As Low As 25c

THE TECH.

The Shelton has been New York Headquarters for college men and women for years. Since the Shelton provides club facilities, with- out dues, you can use the library, the study, the gymnasium, and the famous Shelton pool. This facility provides club facilities, without dues, you can use the library, the study, the gymnasium, and the famous Shelton pool.
