FOUR DAYS UP IN THE WORLD

Among the big events of the year may be grouped the recent developments in the administration of the Institute and The Technology Review, and we wish to be among the first to congratulate those who have been invaluable advisors to us and who, we feel, have been chosen for posts which they are more capable of filling. Although they will not take office till next term, it will be with great pleasure that we can look upon them as administrators for the future.

Specifically, the elevation to more responsibility of J. Rayne Killian, Jr., is a tribute to the Institute as a whole, and fills a duty as Editor of The Technology Review, and his replacement by Professor F. G. Fessenden, Jr., demonstrates that ability to write and to carry responsibility are not swallowed up in the daily operation of Institute life. Although the position of Alumni Secretary may not carry with it as much daily routine and prestige as those mentioned above, Ralph J. Hope who was appointed to the post may feel justly proud that he has shown himself to be an expert in business and financial affairs.

All of these are men who we feel we know and understand, and for whom we have high hopes and appreciative respect. It is of the greatest importance that we keep close to the students as these should hold the most responsible positions demonstrates the tremendous strides that have recently been taken toward humanizing the Faculty and recognizing true interest in the students and their projects.

LETTERS TO THE EDITOR

Editor's note: We regret that we were unable to find a member of the Editors' staff to write an on point note that we desired an editorial last week. Although there was a point of view expressed in the letter printed on page 298 which might have been acceptable to the T.C.A., only 60 Robert College asked for 1939. Also, the letter of 1938 appeared in our November column which was 4 years old at the time it was printed and was not intended to be misleading.

In reply to a question about points do not raise directly on the question of whether the T.C.A. should express this enterprise, we are glad to correct errors.

To the Editor:

We are confident that "The Tech" would not intentionally misrepresent the facts and because we feel that the editorial which appeared in your last issue regarding the "Tech-in-Turkey" project was based upon incorrect information, we feel compelled to correct the record and set the facts on the part of your editorial writer.

I happen to have been familiar with the "Tech-in-Turkey" project almost from its inception and wish to point out that the sum of $1,000 mentioned above is the smallest amount allocated to this project since it was first listed.

I have attended all of the meetings of the T.C.A. and the meeting at which the drive was to be conducted.

In other words, Robert College said that in addition to furnishing board and room for our representative which they have always done, they would try to allocate all the money on the project ($1,000) to the students, that if Technology could not raise enough ($400) to pay the man's salary, they would do their best to have the man stay the whole year.

The members of the T.C.A. felt, naturally enough, that the "morning" idea was perfectly in line with their full amount if they possibly could. In this connection may I point out that Bob Levene of 1939 has been taken for many years by other colleges, same information.

For example, Robert College has paid for "Yale in China." Ambrose is rating 17,500 for "Athenas in Japan" and Smith is rating 1,400 for "Yale in China." Ambrose is rating 17,500 for "Athenas in Japan" and Smith is rating 1,400 for "Yale in China." Ambrose is rating 17,500 for "Athenas in Japan" and Smith is rating 1,400 for "Yale in China." Ambrose is rating 17,500 for "Athenas in Japan" and Smith is rating 1,400 for "Yale in China." Ambrose is rating 17,500 for "Athenas in Japan" and Smith is rating 1,400 for "Yale in China."

The value of the project itself has been confirmed not only by the current group of students but by the large number of individual students who have come to Technology from Robert College. Robert College is one of the founding members of the League of New York Colleges and the first group to visit the Institute, and the influence of "Tech-in-Turkey" is felt not only in Turkey but in all the neighboring states.
