Vol. LVIII Friday, December 2, 1938 No. 48

The Tech

Unless the persons who did the painting own one had a swell lot of fun painting class. Several weeks ago, around Field Day, some fun. There are several short and ugly words for the fun is not the one who enjoyed the fun stops when some one has to pay for the not inconsiderable bill for removing the numerals on the Institute buildings. And the not inconsiderable fun he had in putting on.

School boy pranks are a lot of fun, even if they don’t include School boy pranks are a lot of fun, even if they don’t include. There is, for instance, the situation concerning that type of indulgence, and have so not interested enough to except the Institute Committee, but we are encouraged even by抠s of activity. There has always been considerable misunderstanding caused by the fact that freshmen are required to choose their courses for damages if proved guilty, their inclusion. The latest thing in fishing tackle is a self-luminescent light; it is composed of a hollow, transparent, tube of such a character that, if it can be put into general use, it will be the solution of an acute problem in modern air navigation. (3)

The League has been moved to action by the belief that the lack of international standardization was the cause of many hazards during the World War when doctors were compelled to use hurriedly, drugs which were prepared under nonstandard laboratory directions. (1)

An absolute airliner for airplanes, which is in the process of development, makes use of an ultrahigh-frequency radio whose waves are reflected by the ground or any intervening object and received again by instruments in the plane. The new instrument is expected to give reliable the distance above any solid object, as contrasted with the present airliner which gives only distance above the ground, and it is believed that, if it can be put into general use, it will be the solution of all points of safety in modern air交通 paddling. (2)

Luminous Fish Bait

The latest thing in fishing tackle is a self-luminescent tube. It is composed of a hollow, transparent, tube of a luminous material and is illuminated by electricity. Of course there are numerous books attached in this line for the future. It is intended to be used for deep-water fishing. (3)

Larger Lives Through Science

For the past three decades, the average life span has increased to almost three times the size of the average life span. In the future, it is intended to be used for deep-water fishing. (3)

to the persons believed to be guilty, but that no exonerations were had. After much discussion it was agreed that if these persons did not cooperate with the investigators in giving the letters to the professor, and in paying for damages if proved guilty, their names would be turned over to the Century office for action.

Although a similar motion had been obtained at the November meeting, one requesting official recognition of the Student Council, an organization consisting of technology students whose families have been American citizens for at least three generations was, this substance. The request was denied. Still on the ground that the above-mentioned constitution contained a clause which if accepted, would create a bad precedent—that of supporting organized journalism with a fixed political point. for the future Committee investigations.

CPS Report is Demanded

Stuart Palmer, ’39, moved that the Combined Professional Societies send a report of progress at the next meeting. Despite objections that one report had already been submitted this year, the motion was passed on the grounds that the topic had enough strength to show some results.

The committee also rejected a proposal by Elroy F. De Thierry, ’39, that he be appointed on the committee. A report of the finance committee recommended that the money be given to the Technology Peace Federation, and a savings budget for the Junior Prom was approved.
