A Roxy small Ford plant dot the fields and meadows within fifty miles of Dearborn. We call them the "village industries." Their windows are bright in the sun, and their wheels turn to the harnessed energy of one lazy streams. Many of their workers are farmers who love fine machinery. After harvest and before green-up, these farmer-workmen park their cars in neat rows beside the plants. Inside, with the newest, most modern machines, they build Ford parts.

With the money earned, they buy that fertile forty just east of the pasture lot—families go to school—houses grow wings—farms are filled with magnificent and sheds with back-saving machines.

These Ford families have one foot on the land and one in industry. They raise food for themselves and feel secure. They know that if slack times come, farm and garden will still provide employment.
