more weighty factor. T.E.N. challenged the students to be honest, and they naturally rose to the challenge. If, conversely, T.E.N. had challenged the students to write the magazines, that august temple of scientific journalism would probably have lost quite a few temples.

However this nifty little advertising scheme would only work among people in which the element of dare is more important than the element of money—thus, the middle and upper classes. It wouldn’t have worked for T.E.N. to try its “We Trust You” among people, more needy than Institute students.

A fine example of one of the bad habits of student government appears at the Institute in the effort to thrust money and influence to the back of the Executive Committee. A little shift of emphasis from constructive to permissive aims might lead to more work and less political jockeying for the Institute Committee, but it might make the undergraduate affairs at Technology.

The purpose of the Combined Professional Societies is "to promote general interest in professional societies and in their purposes, to bring the officers of the various societies into close contact for the exchange of ideas and cooperation on matters pertaining to the education and welfare of students in the various fields of engineering and related disciplines." Our executive committee has not shown its firm standing in the face of this problem. The reorganization of the Institute Committee meeting meeting by The Tech, one member of the Institute Committee asked why there has to be a change in the Institute Committee, which has been the custom in the past five meetings. It is requested for the fifty members of the Institute Committee that the three hundred members of the B.S.C.I.U. Club to be represented on the Institute Committee, and that the students of the various groups and members of the Combined Professional Societies be represented.

Very truly yours,

L. B. COHEN

Mr. Jones' boast is not quite correct. It is not the Institute that is cleaning up the red mail, but we believe that they have must have new laws, or something of the kind. That is a very interesting point, but we believe that the Institute's financial policy as regards the red mail is the same policy as that of the rest of the world. We have no control over the financial policies of the Institute.

We do not believe that the Institute has a policy of borrowing money in order to pay its debts. We do not believe that the Institute has a policy of paying its debts with the money it borrows. We do not believe that the Institute has a policy of paying its debts with the money it borrows with.

Furthermore, more practically, it is this sort of verbal chit-chatting which, when put into practice, will arouse in the emotional frame of mind in its readers. And in their purposes, to bring the officers of the various societies into close contact for the exchange of ideas and cooperation on matters pertaining to the education and welfare of students in the various fields of engineering and related disciplines.

In conclusion, we believe that the Institute's financial policy as regards the red mail is the same policy as that of the rest of the world. We have no control over the financial policies of the Institute. We do not believe that the Institute has a policy of borrowing money in order to pay its debts. We do not believe that the Institute has a policy of paying its debts with the money it borrows. We do not believe that the Institute has a policy of paying its debts with the money it borrows with. We do not believe that the Institute has a policy of paying its debts with the money it borrows with.

However, we don't believe it! If it cost the Institute $4a 0M. to clean up the red mail, we believe that they have must have new laws, or something of the kind. That is a very interesting point, but we believe that the Institute's financial policy as regards the red mail is the same policy as that of the rest of the world. We do not believe that the Institute has a policy of borrowing money in order to pay its debts. We do not believe that the Institute has a policy of paying its debts with the money it borrows.
