Computerized Marriage

The computer has made it possible to have a marriage without the consent of the husband.

One of the most common mistakes people make in marriage is that they fail to take the necessary steps to ensure that the marriage is legal.

Some states have laws that require a woman to file for divorce before she can remarry. In other states, a woman can remarry without any legal action being taken.

It is important to consult with a legal professional to ensure that the marriage is legal and that all necessary steps have been taken to make it legal.
