Distinguished Board Of
Experts In Field To Handle
Examimation

Professor Frederick C. Keyes, head of the Department of Chemistry, gave the talk yesterday as one of his last public addresses before his departure for "Almost Absolute Zero." The lecture was given at the Massachusetts Institute on November 23.

The first part of his lecture proceeded to explain the expansibility of temperature scales, source of measurement of low temperature, and early attempts at liquefaction of radon, nitrogen, and other gases, which are next to inelastic and elastic phenomena of the properties of matter near absolute zero.

Rigid and critical temperatures, liquid hydrogen, liquid helium, and solid hydrogen, the latter being having a temperature of 24K degrees Celsius, were then demonstrated and experimented with.

The talk was given during the regular time for the fall lectures.

T. C. A. Up Blind Alley
In Search For Two Cooks

Yesterday

Dir. B. B. McLean, leader of the T. C. A. Club, has announced that the club is now on the look out for two reliable and efficient cooks.

The T. C. A. club is to have its regular meeting on Thursday at 9:00 P.M. and the club would like to have two reliable cooks in the near future.

Weekly Bowling Matches
Are Held By Secretaries

Unknown to most men at the Institute is the existence of a women's bowling league in full swing in Walker. Every Thursday night, the Institute women's league plays against the men's league at the bowling alleys where they are held.

The participants in the league are not particularly interested in the match, but rather in the social aspect of it.

Succession Passed In Orderly Meeting Of The Inst. Comm.

Succession passed the Institute Committee last night, as the revised form met with the approval of student representatives. The long contract was approved and measures were taken to order and decorum despite several objections from the floor on points of parliamentary procedure.

Reinstatement of the Greek was followed by the reading of a letter in which it was stated that their absences were due to sickness, varying times of the term, and "incorrect information." The unanimous vote was made.

Senior Week Pledges Due
With Second Term Tuition

Once again parents can be made to take the rap for wayward sons because of the efforts of the Senior Week Committee. All burgers' pledges for Senior Week options have been made.

The $50.00 options will be re- drawn on the last day before March or the first of April. The cost for redeeming the option will be $50.00. Therefore, full tickets will cover the complete list of Senior Week activities.

Full Tickets Only
Will Now Be Sold For Dinner Dance

Kent Bartlett To Play For
The Dancing; Dinner Begins At 7

Barstett Will Play Music was featured by Kent Bartlett and his group. The band consists of twelve pieces, the ensemble is composed of the usual instruments, eighteen-year-old Burt Bartlett. Bartlett's band has achieved considerable prominence.

Library Exhibits Places On Show
Enough Material To Write Book

The exhibit includes the author's research materials, a 14-page drawing for the book by the author, the book itself, and a graph showing various stages in the design and construction of the giant glass bubble, all of which were involved in the creation of its novel book "The Glass Giant of Dumas."

Dramatizations

"The Glass Giant of Dumas" is dramatized in a cold hard battles which are dramatized in the book.

The great seventeen toot mirror, built on a 40 ton mirror, is the task of holding a 40 ton mirror and the witnesses to find the huge fortune necessary to build it, and on into the amazing telescopes.

With the help of the mirrors and the telescopes, the witnesses are taken to the amazing telescopes and the task of holding a 40 ton mirror.

The question of succession dealt with in the meeting, and "incorrect information in The Tech."
