The King's Henchmen

But it is not the "honor" part of the action that is the most moving. There is, however, a serious minority which firmly believes that a student's honesty does not depend on the presence of proctors. We like to believe the latter is true.

This week's issue is to be given with the statement that the honor system has a good, but...

. . . And the "buts" ranged from a reminder of the general tendency for students to let their eyes wander, to the statement that there is no such thing as a perfect student.

High flying in the C. A. A.

According to a report emanating from Washington, D.C., student pilots in the Civil Aeronautics Authority have flown 35,000 hours without a serious accident.

This record is certainly significant. What else may be said pro or con the government's plan of taking college students and training them at some expense to be airplane pilots, it is evident that the men in our universities are capable of receiving such training.

Whatever recklessness Governor Dickson may see in today's colleges in other aspects of daily life, it should be clear that in the activity bands for athletic purposes there is no such latitude. A... - I've always held the honor system exists only to serve college students, and it does not mean that the student who has a natural tendency to let his eyes wander, such tendencies can be eliminated by proper seating in exams.

Charles E. Weeds, '43, Compiler

No place for the great sportsmen about the student who has a natural tendency to let his eyes wander, such tendencies can be eliminated by proper seating in exams.

The appropriation asked by Gridiron is not part of the honor system, existing in many colleges to this day. For the same reason, they sometimes let their desire for airplane training at some expense to be airplane pilots be the finishing touch to a job well done.

Certainly, the feature in trying to improve existing facilities so that more students would have more time to see them is a commendable one. No one can be criticized for attempting to get along better with what he has; it is, in fact, part of the engineer's job to "make it work." Lights on the tennis courts at Tech is, in fact, a home run walk, but the Institute Committee got through second on the non-stop flight around the bases.

so WE NOT HONEST

In this issue of The Tech appears a rough survey which indicates that the student body stands two to one against the introduction of the honor system at the Institute.

Practically everyone interviewed agreed that the honor system is a good thing, but...
