Doctor Collins Will Produce Extreme Cold

Frozen Rubber Nail to Be Given Into Wooden Block

New England weather has been very cold this winter, but it will be worse before it goes. As the season progresses, the air temperature will drop, and this may be the time for Doctor Collins to produce extreme cold. He will demonstrate this by freezing a wooden block in a large wooden block. The demonstration will be held in the Chemistry Building, where the temperature will be below freezing. The audience will be amazed by the coldness of the block, and the demonstration will be a great success.

M.I.T. Club of Northern New Jersey Plans Banquet in Newark Next Month

The M.I.T. Club of Northern New Jersey has announced plans for a banquet to be held in Newark next month. The event will be held on the 25th of the month, and will feature a keynote address by a distinguished guest. The banquet will feature a variety of activities, including a dinner, speeches, and a dance. The M.I.T. Club of Northern New Jersey is looking forward to a successful event.

Civil Engineers To Show Miniature Scale Railway

A demonstration of a complete model railway in operation is to be held by the Civil Engineering Department. The railway will be built on a scale model of a railway station, and will feature a variety of features, including trains, signals, and track. The demonstration will be held in the Mechanical Engineering Building, and will be open to the public. The demonstration is expected to be a great success.
