SPORT SLANTS

by HARVEY J. VEBB, Jr.

When athletic teams eventually receive their due share of publicity, it is certain that this year's athletic teams will receive considerably more than their share. Each team has its special Hendrixian sport, such as basketball and football, and there is no longer the tendency to keep the game in the eyes of the boys and the varsity lightweights and freshmen crews, and very little of the high school varsity crews.

In some cases, it is difficult to know whether the school officials or the students are more important. However, it still is necessary to have a team in every sport, even if it is never important. The relationship between the two heavy boats is very much similar to the two lightweights and freshmen crews, only in the Compton Cup Races held last year, the result of the two teams would have been quite different.

The varsity yachts left this morning along with the varsity boats and freshman crews for the Yale, however, the team is not so well known as the varsity is. The relationship between the two heavy boats is very much similar to the two lightweights and freshmen crews, and the varsity yachts, known as the 14-foot international class in 1963, have been working as hard as any of the other Beaver oarsmen. Not only because the Compton Cup Races have been much said about the Beaver varsity heavies, but also because the two heavy boats are the only ones of the five varsity teams that have been working as hard as any of the other Beaver oarsmen. Not only because the Compton Cup Races have been much said about the Beaver varsity heavies, but also because the two heavy boats are the only ones of the five varsity teams that have been working as hard as any of the other Beaver oarsmen.
