Dr. Paul Ehrlich Outdid Paul Ehrlich Outdid By Prof. H. Q. Vestibule By Prof. H. Q. Vestibule With Anti-bug Chemical With Anti-bug Chemical "607" Does Things To Ya "607" Does Things To Ya Marmaduke Finds Out Marmaduke Finds Out After Giving Life After Giving Life For Sake Of Science For Sake Of Science

A stupendous new chemical with startling effects has been developed for use in purifying the Swimming Pool according to Professor Hor- tenius Q. Vestibule of the department of Biology and Public Health. Working on the theory that Dr. Paul English didn't go far enough in his discoveries, Vestibule was able to discover the "wonderful chemical "607", technically known as 233.6-
(Water) dissolved around 82-
(16) atom 16-P. in a 96-liter (2.5-gallon) glass.

The cooperation of Professor Vestibule was requested by Professor William V., dean of the department of Science Education, after a number of complaints by the students of uncleanliness in the pool were reported by the janitors. It was concluded that this responsible disease was caused by some absorbed by the water in the Swimming Pool water. The two professors completed their research with great alacrity.

Marmaduke Q. Vestibule, captain of the diving team and a prominent member of the Senior Week Committee, assisted his father with the experiments, gloriously giving his life for science.

Marmaduke carelessly forgot that the element is deadly to all malignant organisms; thus he died horribly upon selling some upon himself after his triumphant victory in the Senior elections. Let his fate be a warning to all those who try to use the pool.

The new sanitary engineering development is guaranteed to kill all bacteria in the water by dissolving them completely. A minor distressing incident occurred when Halfman Karasick, accidentally slipped into the pool after the chemical had been added. Karasick disappeared completely except for a small, flat bottle with a black and white label.

When interviewed about the tragedy, Professor Vestibule stated: "That sort of thing is bound to happen occasionally. Why, last year I accidently dissolved my son Marmaduke just after the members of his class had accorded him a high honor."

Walker Room Christened Walker Room Christened W. R. Ahrendt Lounge W. R. Ahrendt Lounge

The little room opposite the T.C.A. office in the basement of Walker Memorial has been dubbed "The William Robert Ahrendt, 'M. Lounge", the Committee for Naming Things at M.I.T. announced late last night.

This honor was conferred on the late Mr. Ahrendt in recognition of his splendid work in confusing the general public. The Committee said. The newly christened room is connected by a ventilating fan to the office of the Walker Memorial Committee, of which Mr. Ahrendt was chairman. Until now the William Robert Ahrendt, 'M. Lounge bore the simple label "Men."

Halfman Karasick Halfman Karasick Turns Turtle, Bites Dust, Turns Turtle, Bites Dust, Will Pour At Tea Today Will Pour At Tea Today

A prominent Technology couple narrowly escaped a serious accident last week when their sport roadster turned turtle and then turned over on the Harvard Bridge.

The car was completely demolished before and after the accident so that no serious harm was done. Mr. Halfman "Come-down-of-your-whichair" Karasick was thrown through the windshield onto the radiator, down through the motor into the carburetor and out through the exhaust pipe. He was able to dance home unassisted.

An investigation was at once started by the State Civil Service Commission and the Massachusetts Society for the Prevention of Cruelty to Children (Mt. Vernon St. Division).
