Microfilm Cameras
On Exhibit in Central Library
Stuff To Demonstrate New Apparatus Throughout The Week

An exhibit of the latest development in microfilm recording apparatus opened in the Main Lobby Friday. The exhibition will end on November 22.

Among the exhibits will be both recorders and projectors. The silent film records are rapidly coming into use in the various business institutions as an effieent way in which to present the day's news or the latest schedule of events.

The apparatus on view will include a Kollmorgen projecting machine, an Argus telescopic (a microfilm camera and projector which records words or pictures on microfilm in such a way that they can be viewed by a simple magnifying glass), and a portable apparatus designed for use in libraries and business institutions.

A glass with a magnifying glass is to be made of a roll of microfilm. (Continued on Page 2)
