AGENDA — A CHALLENGE

As a direct outcome of the trouble in the dormitories last Field Day eve, a general assembly was held, levied upon the entire undergraduate dormitory population to pay for the damages. In addition to this, Agenda has increased responsibility in the regulation of the freshmen and further moves have been made to change its set-up. The assessment was passed to pay for the damages and the Agenda changes were made in an attempt to help break the growing tendencies, and would probably cause them to make up their minds and join the organization that would tend to make a more adequate dormitory. Ten members of the freshman class should be elected by that class at the end of the second semester. These ten would then appoint five more members of their class. The retiring members of Agenda should be afforded the courtesy to submit their names to the ten elected by the freshman class, further nominations from the freshman class as a whole in the order.

In this way, one organization of interested members would be given full control and responsibility of the freshman relations, and the class as a whole would have a choice in its representatives. However, since only the Institute Committee and the agenda itself can make any changes in its constitution, Agenda will have to show its earnestness in its desire to accomplish something by giving up a few rights to gain worthwhile objectives.

Adams Will Speak To Math Society

Mr. Douglas P. Adams, of the section of George, will speak to the M.I.T. Mathematicians Society on Tuesday, January 14 at 4:50 P.M. in Room 1225, M.I.T. Adams will speak on "The Non-isomorph Chart," explaining the theory and construction of charts (and their practical uses). The Greater Boston Mathematics Club Associates will hold their annual meeting in Room 85 of the Science Building of Boston College on Wednesday, January 15 at 7:30 P.M. The principal speaker, Professor Harold A. Eaker of Boston College will speak on "Determinants of the Third Order."
