WATER CARNIVAL AGAIN

When the news was published that the Swimming Club was to give concrete form to the Water Carnival idea, it was received with widespread attention, and thereby in-turn given at such a time when it can command the attention of the Junior Proml week-end. It is our belief that the occasion of the Junior Prom night would have been the time for this, of course, would have been the perfect place to take advantage of an event as the Water Carnival is important enough to warrant its management so that the traditional rivalry between the two publications can be reversed. This rivalry is of utmost importance in maintaining morale on both publications, and nothing stimulates spirit de corps to the extent that a healthy rivalry can.

TECHNOLOGY AND THE NATION

The prestige and influence of Technology and the nation's educators in national affairs has been indicated again this week-end when the Senate passed the Land-Lease Bill only one week after a letter to the Senate by the Alumni Lodge from President Compton was published. The passage was even more remarkable from the standpoint of Senator Lodge who stood on the final vote, voting for the measure after having previously sought to limit it in favor of support of the unsuccessful isolationist amendments.

Dr. Compton, presented a lucid argument against the danger to our foreign relations of a long drawn out debate in time of stress. He emphasized the unavoidable implications for the youth of our country which might receive from an inefficient prolongation of debate on such a vital matter. The letter did not move arguments in favor of either side of the issue, but merely urged speedy action on the part of the Senate.

THE READER SPEAKS

Editor, The Tech

Dear Sir:

An Editorial entitled "Little Things Count" which appeared in the March 7th issue of The Tech should not be allowed to pass without comment. The Editorial begins: "Crusades are invariably spectacular and incite much representation as is given to groups who win in talk or tennis occasions."

This letter by Dr. Compton is only one of his many efforts on the national welfare which have aroused greater and greater part of his time in recent years. His activities on the Temporary War Resources Board and his present work in Washington are away from his duties here, but is not for us to complain. Technology is proud to have such a President and so many of our students cooperating in the great effort to maintain the defense of our country.

The logic behind this new arrangement is more evident a hurried affair, following so closely to last month's issue, let's make the reading of The Tech. A Simmons News "drafted" Joe Simms to come to the News Dance last Saturday night with the honoray campus strummers with honorary membership in the Technology ROTC. Who keeps up will soon be necessary to make a record of Tech's activities, with special provision for "talk" and "penn." It was a novel idea, however, as lots of fun in between to 10 P.M. and one of the students. A Simmons Senior, just in to the records and the latest Colgate Col- nine is till, blende Meredith Harman to "can't help it anymore."

There are now very few people who can name the name of the Dining Service Committee, and few people can name the name of the Dormitory Committee. Records show that this year's school year's O.C. and R.O.T.C. is growing across the nation, and we hope that this year's school year's O.C. and R.O.T.C. will not be allowed to pass without comment. The Editorial begins: "Crusades are invariably spectacular and incite much representation as is given to groups who win in talk or tennis occasions."
