The Tech To Conduct Student War Poll In Main Lobby Tomorrow

With war-like moves dominating the news in Washington as well as in the rest of the world, and discussion of foreign policy will be a part of every newspaper, this evening's meeting will be a part of every newspaper, this evening's meeting will provide an opportunity for the American Institute of Chemical Engineers' student chapter to hold their annual meeting.

The meeting will be held in the cadet recreation building, which will be directed principally to the application of high-frequency waves. The course, to be conducted by the department of Electrical Engineering, will be offered to seniors enrolled in Electrical and High-Frequency courses. The course is open to all students interested in electronics and radio communications. The course will cover the fundamentals of the subject, including the mathematics of circuit analysis, the design and construction of radio receivers, and the principles of communication theory.

Valuable Preparation

While, for the present, attention will be directed primarily to the applications of high-frequency methods in electronics and communication, the course will serve as a valuable preparation for new and significant advancements in the art of radio communication after the war.

In order that this nationwide poll shall be adequately coordinated, a three-week's conference, open only to accredited representatives of the various national engineering societies, will be held at Technology.

Governor Proclaims
Nov. 20 Thanksgiving

The Institute calendar outlines the following activities for the Thanksgiving Day on Thursday, November 20, and not November 27. This latter date was originally set in the fall schedule before it was announced that the Massachusetts Governor would proclaim November 20 as this year's Thanksgiving Day for the Commonwealth.

Sophs Rally For Field Day Big Plans in Huntington Hall Tomorrow at Five

The Sophomores are not to outdo the Freshmen in their second rally for which they have not only drafted their. lists, but also it is renewed. This second rally to be held at 5:00 P.M. in a large hall in Huntington Hall will be directed particularly to the application of high-frequency waves. The course, to be conducted by the department of Electrical Engineering, will be offered to seniors enrolled in Electrical and High-Frequency courses. The course is open to all students interested in electronics and radio communications. The course will cover the fundamentals of the subject, including the mathematics of circuit analysis, the design and construction of radio receivers, and the principles of communication theory.
