A PROBLEM
One of the favorite complaints made by students instruction about the various courses is that the instructor
izes different symbols for the same physical quantities.
All this condition is probably recog-
ized by the students—unfortunately dis-
mined as one too trivial for serious considera-
However, from the viewpoint of the student—particularly the one who has dif-
cially absorbing the material at the rate it is
offered here at the Institute—this lack of orga-
ingen of the body material of the Tech.

SOMETHING NEW IS ADDED
To choose students who were puzzled as to why this and the last issue of the Tech were
so much easier to read, we take this opportu-
nity to announce the trial of a new type
face for the body material of the Tech.
The student of typography will recognize that the new type is Icionic as compared with the
former Modern type. The Icionic type is a
new font that has been scientifically de-
digned to permit easy reading. This effect
was accomplished, as can be noted by a com-
pared with old issues of the Tech, by
making the individual letters larger and more open.
