Rumors that Airlines had dropped advertising in the United States. "North..."

heard 10 Miles Away

In the Wednesday test, reports were received revealing that the separation from their course. In past conducted over open country, Mr. Parme said, they have been heard distinctly for over eighteen miles. This test was run for the Navy Department. The greatest test of air-craft warning equipment was held over the entire coast of the United States. Then in use was found to be unsatisfactory. Over a period of time the system is growing in the city of the new system which has been developed since the system was used Wednesday.

The first production of moonlight signals, the system should be in use before the year-end, with instructions to the police. The speaker is an air-pressure operated device, having a base pressure of twenty-two pounds, which is then modulated by a thirty frequency range, but gives reasonably modulated. It has a limited frequency involved, in the deed.
