told further of an entire battalion which had been formed of skilled chemists and how this "Chemists' Battalion" had been wiped out in a single action, a blow to England's munition industry from which it never recovered.

Although the fighting that week is over, every student should consider his place in our country's war effort before making any hasty decision to leave.

We students have had considerable training to complete their nation's war effort.

Although this unwarranted attack has ap-

parently been extremely costly to us in ma-

terial and personnel, it may be that this

event of the week-end.

This week-end, the Japanese were not the

only ones to swing into action, the Junior Prom Committee taking the initiative in an attempt to substitute for the regular program for the traditional Junior Prom.

We think that this is one of the most favourable displays of patriotic activity that we have seen at the Institute. Not only should it be supported by the Class of '43, but by the entire student body. The text of the letter to the Juniors is as follows.

December 3, 1941

Fellow Committee Members:

In the fall elections you, as a member of the class of 1943, chose five of us who, with the Class officers, will serve as the Junior Prom Committee. Even though the Junior Prom is not considered to be of the same standing social event of the year. In order that this Prom will reflect that the Juniors are as much a part of the class as possible we want each of you to aid in making this committee's work successful.

In this informal letter we wish to give you early notice of the Prom, in the hope that you will inspire both these suggestions and also criticisms from your committee.

The first problem which confronted us was that of an orchestra—should this year's dance follow in the steps of the last few months and have a "name" band? Another alternative, one more in the "party" if we were to arrange with some hotel or hotel chain we could arrange for that Saturday.

Under these lines we hope to arrange with some hotel or hotel chain to provide an abrupt Technology basketball game. That

Music: Mr. W. Bunker, Dean of the Gradu-

ates, noted the mistakes made in his own native land in raising "Kitchener's Mob" in 1915. He pointed out how the best of England's thousand and how they had been practically annihilated in three month's fighting. He

be ordered by the War Department. It

was Dr. Compton's opinion that the Institute has already deter-

mined and has been following throughout the past year the course of action which will be of greatest value to our country. The research

during this year has been slow, and not sudden, because of supreme importance.

"Complete Education", Urges Bomker.

At the recent meeting of Professor J. M. W. Hunter, Dean of the Gradu-

ate School and chairman of the M.T.E. Safety Committee, expressed the hope that students would con-

continue at school regardless of the declaration of war. "The experience of a top of Britain has shown that the most

psychological thing we can do is to con-

tinue to work. We are doing that. We are doing all at present." He deplored the tendency shown at other col-

leges and at Technology during the last war for students to succumb to

the glitter of uniforms and recruit-

ing drives to leave school.

When Colonel Edward W. Peay, head of the department of Military Science was queried concerning possible changes in the status of the R.O.T.C. here, he replied, mentioning taxes to the effect that it is something we cannot contemplate. The colonel added that, as far as going to war is concerned, it is expected that the advanced R.O.T.C. this June would be called to active duty soon after graduation, subject to the call of Corps Area com-

manders.

Hey, HEADING FOR HOME?

Start right away and say: Send your luggage right away by stage to your nearest railway station and you will get all the information you need about the time your luggage will arrive. Ask your travel agent in a Co- operative Station for details or call our own local office at 52-20 Newton.
