Students Hear Plane Maggert Design Told Of Experiments With Unusual Aircraft

Irby Sibert, noted airplane designer and director of research for the Perpetual Motion Machine Unmasked, told a large audience that the experiments with such aircraft were finished in December.

The experiment was finished in December, in part by the late Francis Compton, who was said to be stricken with a disease.

One of the principal troubles is that they are not being advertised properly.

Junior Prom Options Redeemable Feb. 24

In an effort to speed formal arrangements for the Junior Prom, members of the Junior Prom Committee have decided to advance the date for options to take effect from March 15 up until Tuesday, February 24. It was announced that the options are three dollars and sixty-five cents, which completed the invitation.

The new date replaces the old time of April 15 and leaves the options on the campuses for the rest of the semester.

Body Resistance Battles Virus In Fight Against Common Cold

Preventive Medicine—Prevention, Care of Colds

It was winter and Old Man Resistance was having a particularly hard time of it. He was being outsmarted by the little peaky of his charges, the common cold, which in most cases is always in his throat, was continually on the watch for the times when Resistance fit weak and below par.

Then he came upon him, felt the body and developed colds.

Old Man Resistance’s doctor told him that it was important to stay strong enough to keep Cold Away.

The Tech Exposes Shop Fraud Perpetual Motion Machine Unmasked

Your inquiring reporter has discovered a little fraud which is almost preposterous upon the student body at Tech. Three days ago, an unscrupulous group, mostly consisting of members of the notorious hobby-shop, placed an alleged “perpetual motion” the lobby of the Building in the basement of the building. This was obvious from the start that this was a deliberate attempt to rob the student body, and throw the honest student into confusion.

The so-called “mystery machine” consisted of a small plastic wheel which was rotating at an exasperatingly slow rate between the poles of what looked like, and was—a “magnetic magnet.”

The whole apparatus was transparent, and there were apparently no wires connected to it. There, however, was a wire which ran from the pole of the tower in which the apparatus was encased.

People began to use the machine in the lobby of the Student Building, and they were astonished by the results.

As it happened, all was not what it seemed. A little bit of careful investigation disclosed that the “machines” was actually a toy based on an idea put forward by Thomas A. Edison as much as fifty years ago.

Senior Fraternities Will Hold Punch Parties Over Prom Weekend

As a meeting last night, the Junior Fraternity Committee, decided to hold punch parties at six fraternity houses on Saturday afternoon of the Junior Prom weekend. The meeting was held at the Delta Kappa Epsilon house, where the Delta Phi house, the Sigma Alpha Epsilon house, and the Pi Chi house, were all present.

The expense of the parties is to be split evenly between the Junior Fraternity Committee and the I.F.C. treasury. This decision is pending approval of the Junior Prom Committee.

The conference also elected Maurice T. Taylor, ’46 of the Lambda Chi Alpha house as a new member of the executive committee of the organization.

Study Lecture Series To Begin

Professor Magoun To Give First Talk Monday Afternoon

Next Monday will mark the first of this year’s lecture series on “Study and Reading” at 4:00 PM in the basement of the library.

Professor Magoun will deliver a discourse on the subject of how to plan one’s study time.

The series of lectures are sponsored by the Alumni Faculty Committee, in the hope that the Alumni will aid the student in the gain of the benefits of efficient study.

In order to make the lectures available to almost all students of the class of 1943, they will be broadcast on the radio, series A, on Wednesday, February 16, and 23, and March 12, and 19. Both series are to be given in Room 200 in the basement.

Sr. Week Will Begin April 24; Options On Sale

Barn Dance Replaces Tech Night At Pops; Options Cost $4.35

The new Sr. Week Program has been announced by a Young Typist, secretary of the Senior Week Committee. The committee is almost ready to announce the program.

The committee has received the list of events for the week, and they are to be announced at a later date.

Public Drawing Will Be Held Next Week To Select Winner

Party Plans Proceed

“Home liquor party is going to be the largest and most successful party of the spring prom option next week,” said R. Birkett, a sophomore member of the Junior Prom Committee. He explained that there was to be a drawing of tickets, the last prom night of next week, and the person whose name is selected will be given a free ticket to the party.

It is believed that this was being done in order to induce students to get their tickets early. This would enable the committee to know what the attendance will be for the prom night and enable the arrangements at an early date.

The committee has seen the futility of the party at the lobby of building 20. These tickets will be sold for the rest of the week and they will be limited to next.

Childehorsley placed emphasis on the big prom-week end. He announced that arrangements with the I.F.C. for cocktail parties at some of the fraternity houses were well on the road to completion.

It is said that the dormitory committee was going to hold a large party on Friday night of next week. This was to be followed by a buffet party at the Kappa Sig house on Saturday night. The committee will feature an out of town orchestra.

According to Childehorsley, the com-

mittee cannot at present reveal the name of this orchestra because negotiations are not completed.

However, he said, when the name of this orchestra is announced, it will be given with much enthusiasm.

In the event that negotiations with this particular band fall through, the prom committee would still get a good out-of-town outfit.

Senior Rings To Be Available Feb. 16, 17

Senior rings may be obtained at any time before Saturday, February 16 and 17, at the Lobby of Building 20, according to the announcement of the Senior Fraternity Ring Committee.

A meeting of the committee will be held on the late afternoon, Building 20, February 16, and the committee will be in charge of the sale of senior rings.
