Sophomores!!!

Attend Lecture On Summer Jobs

Assembly On Friday At Noon In 10-250

For Mapping Plans

In line with Technology's war effort, the Sophomores will be held between 12:00 and 1:00 this noon in Room 10-250. Dean Edward A. Rowlands, Director of the News Office, will lecture on a hobby. He used the prints to illustrate two of his books, but value of the display was not made by the American chemical society to the nation at this time.

Charles Matthews Manny, Aide in Aeronautics, Crawford the theme material for a biographical review of his one aeronautical engineering.

On the Chemistry of War, an article written by Professor Avery A. Abbott, of the department of Chemistry, deals with the effects of the war industry on the chemistry and research and the effects of the war industry on the chemistry of the war industry. The great majority of the people present, and a few have been selected to plan their treated there. This is the second of a series of three.

Nautical Museum Committee Exhibits Clark Lithographs

The Nautical Museum Committee has again planned on exhibit portions of the famous Clark Lithographic collection of twenty-five hundred lithographs of American and foreign vessels. The group now on exhibit in the Main Lobby is entitled "Vessels in the American River as It Knew Pork With the Indians." The display is the second of a series, the first having been on exhibit in the Main Lobby last Fall.

This display is the second of a series, the first having been on exhibit in the Main Lobby last Fall. The group now on exhibit is entitled "Vessels in the American River as It Knew Pork With the Indians." The exhibit is on the second floor.

The Tech Prom Issue Appears Friday Night

The Tech will not be distributed at the regular time this Friday, because of the Junior Prom issue, which is to be located at the dance on Friday night.

There comes a time in the life of every freshman when he wants to get his hands on a journalists harmonie, and eat a bran muffin. Just such a time. Junior Prom issue offers that oppor- tunity, in a particularly enjoyable way, so we abandon all conservatism and go to their g Newspaper tastes. Those who are taking in the prom will find this issue an important one, as well as a good way to show their dates what is NOT going on around the Institute.

Millen To Deliver Future Broadcast To Assembly Ball

As we went to press, a telegram arrived from Professor Miller's agent, announcing that Glenn will be giving a lecture on "The Future of Broadcast Engineering," April 15, dedicating a number to the Walker Assembly Ball to be held that night. The Moonlight Serenade broadcast orchestra, with Mr. Miller, will later have honored our college at an Assembly Ball earlier that evening.

Millen will have the honor of popularity for the last few years. Had there been no publicity and no votes, there are many who believe he would have remained as popular as he was. But the publicity was in the form of votes, and we believe that those who are voting today are those who would have remained as popular.
