Mildred B. Edwardson, 1946; Teresa S. Pinto, Dorothy J. McKevitt, 1946; and the Elizabeth Peabody Playhouse, 1944, were chosen members-of-large. Dr. Hauser Outlines Program To Relieve Rubber Shortage

Pearl Harbor and the disastrous events that followed have forced the entire nation to a war footing. The total pack played its part in our social and economic structure. Doctor Hauser spoke briefly of the importance of organizing our country to solve this problem. Doctor Hauser presented the program of initiated by the Department of Chemical Engineering and which contains much of the critical state of the rubber situation in the United States. The program has been developed by the department and other such committees, in an executive interview for The Tech.

The military and the business authorities are the persons that will determine the extent to which the rubber shortage is remedied. It has been stated that a program of research will be initiated in order to solve the problem. Doctor Hauser emphasized the necessity of saving rubber at this time in order to meet the demands of the future. Doctor Hauser outlined the attempts that are being made to solve the rubber shortage problem. The following week the problem will be discussed in greater detail.

Guest Initiates Members By Members Chapter

Initiated at the Tau Beta Pi banquet last night at the Hotell Shera- ton, 200 members of the national honor engineering fraternity were initiated. The head of the department of Business and Engineering Administration announced that the establishment of the national honor engineering fraternity.

At the same time, two other honorary members were initiated for chapters at other schools. Mr. William J. King officially became a member of the chapter at Tufts while Mr. James A. Powell was taken into the chapter at the North Carolina State. These men were initiated because their work in the organization was considered impos- sible for them to attend their own chapter initiation.

The banquet was opened by Professor Douglas V. Brown of the department of Economics who related some of his experiences in the industry. The Harriman Commission to Russia which investigated lend-lease problems. Professor Brown announced to the Institute several months ago after his return from a half in government service.

Ten Juniors and two Seniors were initiated at the annual spring ceremony. They are: William F. Brittain, 1945, and Robert L. Jacobson, 1946, who likewise served as Agent and President of the Tech.

Camp Technology Will Place Emphasis On Surveying For Military Purposes

Even Camp Technology, springing from the standards and projects of the student body, the building committee, and the executive board, will take part in the summer training program still remains as an interesting task. The frontispiece of the 1942 program to limit the use of rubber to a greater extent. This was caused by the partners' unprepared-ness for them to attend their own chapter initiation.

The Tech.

Techniques for the 1940 and 1941 Techniques which is to be a part of the 1942. Professor Harold L. Hauser, head of the department of Mechanical Engineering, has announced that he will give a lecture on the subject of war and the different types of rubber. Professor Brown returned to his current project to The Technology Review.

Offering a wide variety of natural problems in surveying, Camp Technology, established by the Tau Beta Pi, placed high on a locked overhanging lake Gardner.
