Freshmen Debates Pass Second Round

Nine Sections Survive, Qualifying Finals Are Announced. The results of the annual freshman debating tournament for 1942 have been released and show that nine sections remain undefeated. The first round of competition was held in the various small halls and classrooms as are all other freshman debates.

The second round was held April 30 and May 1. The winners were: Probes, Prof. Ralph F. Wilbour, '43, Professor of Biology, open 11 A.M., Monday, Wednesday, Friday; Probes, Prof. O. R. Line, '43, Director of the Freshmen Debates, open 11 A.M., Monday, Wednesday, Friday; Probes, Prof. C. Prescott as the head of the Biology Department and Mrs. Francis O. Schmitt, who is to succeed retiring Professor Samuel E. Ramus, as the head of the department of Geology and the head of the newly re-organized department of Geology and Biology.

In an article entitled "As Round the World," Professor Wilbour described the trip of the "Cub" into the southern polar region. Professor Wilbour also lectured on the history of exploration in the Antarctic, and the day following the expedition's return to campus, a picture of the expedition, which was made the first thorough investigation of the region and resources of the southern polar continent, was shown in the Main Lobby of Building 10.

The pictures include many aerial photographs. A map of Antarctica shows the entire continent and some of its islands, including the South Pole. The pictures also show the various aspects of Antarctic life, such as the scientific work being done, the seals and whales that inhabit the region, and the land and resources of the continent itself. The pictures are a valuable resource for anyone interested in the Antarctic region.
