THE TECH

Collegiate Roundup

by Paul Thalby

. . . Illinois Tech has adopted a novel pre-engineering program which is expected to add more than one half to the enrollment of the Institute to the nation's war effort. Industry money taken at the Chicago Institute include the acceleration of the Class of 1943's achievement. This plan will be put into effect immediately after the close of the present academic year, and will be completed at the end of July 1943. Five months ahead of schedule.

. . . one way of solving the enrollment difficulties which have been presented by the war is reported from Centre College, Kentucky. Successful reduction is the number of freshmen who are too small to appear to be the backbone of the senior class. College Center has reduced in past years from extremely high freshman mortality rate of 15 to 25%. An entirely new housing plan for freshmen was effectuated by the institution of small residence halls in the college dormitory. The growth of freshman sacrifices in the academic standards will be made, and at the same time, the men in question will become valuable engineers during the months ahead of the normal time.

. . . What Harvard Thinks of Wellesley Just isn't the answer. Harvard is smartly aware that opinion of Wellesley girls, still, a half-dozen inches of centered newspaper. In a hopeful age, the Harvard man in question asks the institution of Wellesley girls, and hopes that they will accept the following offer, which they were meant. There is no evidence of what spirit they were meant in. In order to achieve the statements with respect to Wellesley, Harvard will do its utmost to prove Wellesley an extremely serene and agreeable place for women. They may sit down at their desks and write us that they will not refuse to print an article on a matter for which they are in agreement with their institutions. Making no bones about completely eliminating the discussion, the Wellesley News makes the crassest statements offered in the Harvard article just didn't come up to

. . . The National Polish Student Federation, which probably (in our opinion) last time reported from Boston at the Student Division, Chime to the leading Illustrated Sporting Journal in the World. Not so much the matter with the notorious Police Gazette, the present-day and elegant, with nothing but the most noble aspects of a counter-ebble subject. It is a kind of study proclaims a lecture on the Elastic Properties of the G-string, loud proclaims a lecture on the motion of the G-string are some. What the reality of the crisis that concerns Harvard men now have the opportunity of taking, and prepare them for entrance into the college in the coming fall. Thirteen weeks of intense study is planned for these high school seniors in the essential preparation for engineering. In this way, the sacrifice of Wellesley girls in the academic standards will be made, and at the same time, the men in question will become valuable engineers during the months ahead of the normal time.

. . . You and your friends can share together the work and fun of flight training, and after graduating as lieutenants or majors—wars—equal the right to be flying officers in the U.S. Army Air Force. Under the new Army Air Force Reserve Plan—If you are a senior or junior with so brave and intelligent a mind, become better prepared for Officers’ Training.

New Simplified Requirements

You may qualify to be 18 to 26 years of age, physically fit and pass a new, simplified mental test which college men find easy. When you are ready for active facilities are ready to man aviation Cadet at $75 a month, with expenses paid. If you have majored in science or engineering you can try for a commission in the ground crew—in Armaments, Communications, Engineering, Meteorology, Photographic. As a Second Lieutenant on active duty, your pay ranges from $125 to $150 a month.

50% Train Commissions

Due to thorough training—four out of five aviation Cadets plan year's work showed that 67% achieved a commission. The tremendous expansion of the Air Forces should assure rapid advancements in all branches. And after the war—you'll be ready for the ever-growing opportunities in aviation.

Set Your Service Now

The years ahead are war years—and every college man must seize the chance for a lifetime.

To America supreme in the air we need every college man who can qualify for active service.

So take advantage now of this opportunity. As a Second Lieutenant on active duty, you are airborne today.

See your Faculty Air Force Advisor for information and help with details. Join the thousands of America's college men who know that their opportunity is practically endless.
