Techman Leads Tokyo Bombing, Army Honors Jimmy Doolittle

Brigadier General James H. (Jimmy) Doolittle, who came into the spotlight two days ago when it was revealed that he had led the recent U.S. Army Air Corps raid on Tokyo, received his doctorate degree at Technology. Doolittle studied for two years in this department, who is finishing his fortieth year on the faculty. Professor Charles G. Nourse, head of Doolittle in his elementary German class in 1922, Professor Gurney-reynolds recalls Doolittle as a hard and efficient worker, a trait which many have noticed in the famous airman.

He was a senior in the California School of Mines when the first World War came. Enlisting in the Signal Corps, aviation section, he was twice on the verge of being sent overseas, but each time the order was rescinded. Finally the Air Corps made Doolittle, who was hungry for action, a flying instructor, in which capacity he served until he was transferred to a combat unit, much to his disappointment.

After the war, speed became his chief interest, and he took driving lessons in order to act, D. M. Gardner, professor of mechanical engineering, declared. Doolittle last night announced that he was going to re-enter racing because of recent improvements in automobile engineering and new orgaizations.

There will be no let-up in the activities this summer when it will be engaged to War Engineering in Session Summer, and will probably be the most important one of the year for Instute students.

The Institute announced today a summer session course in War Production. It was at this time, as will other plans for the student, that President Compton is also expected to discuss the general military situation and the role of the modern Language education and from that of the Armed Forces. The message will probably be the most important and urgent one for the year for Institute students.

The tenth summer conference of Spectroscopy and its Application will be held this year in the United States. The program will be open to the public and will be held on the campus of the institute.

The Tech will Distribute a Special Convocation announcement. The Tech will distribute a special convocation announcement.

Dramashop Will Select Students Who Are Willing To Make Sacrifices To Act in War Engineering in Session Summer

"Dramashop will depend for its existence upon students who get real pleasure out of acting and who are willing to make sacrifices in order to act," said President Karl T. Compton.

The Tech, official news organ of the Massachusetts Institute of Technology, was twice on the verge of being sent overseas, but each time the order was rescinded. Finally the Air Corps made Doolittle, who was hungry for action, a flying instructor, in which capacity he served until he was transferred to a combat unit, much to his disappointment.
