Ballooningist Extraordinary Greene
Provides Theme for Aero Exhibit

Today the sky of airplanes, often
rigorous and unchangeable, was
open to all. A peculiar exhibition of bal-
loons, or aeronautical material, was
building up the days when these
vehicles were not only in vogue,
but so popular as to be considered
an essential to the air force. A
man who first started to think of
the air as a mode of travel, the
man who recognized first came
pioneers. The existence in the south
lobby of the library of advertising
folders and books particularly
depicts the story of a certain
general manager.

Prof. Dawes Heads Scrap
Salvage Committee

Tanners will be available for the
more valuable materials and for
locality. Materials should be
separated and deposited in the
correct category except in the cases
where physical separation is
indispensable. In the latter case, the
scrap should be left in an un-
marked pile.

Group Depots

Depots for the Graduate House,
the Dormitories, and the fraternity
houses are to be provided for these
groups. Warren Foster, '43, is in
charge of Preservation collections.
Mr. Doe will superintend at the
Dormitories.

Establishing a precedent for the
year, the annual Catholic Club Ac-
quitalion Dance will be held on Oc-
tober 16th. It will be open to all
and attendance will be restricted to
the Freshmen.

In addition to the scrap depot
listed above, a salvage depot, B,
will be located near the Juncture of
Buildings 2 and 3 as a reservoir for
materials for which there is no
immediate need by the department.

These men desire to have the donated scrap
safeguarded against the casual hands of
passers-by.

New Navy V-7 Plan
Open To Juniors, Seniors

(Continued from Page 2)

Navy V-7 plans recently have been
becoming very common. One of the
most outstanding drawings of this
year is the V-7 plan which is the
latest innovation in the line.

The V-7 plan is a very new
innovation, and it is the first of its
kind to be successfully produced.
