Dr. Compton's propitious letter to the students of Tech-
ology comes at a particularly opportune time, for in the mass
of vaguely worded documents repeating to tell the student where
he stands, this much has been given as definite procedure
from the Institute. In the opinion of Dr. Compton there is one definite step
agreed to refund proportional tuitions. Moreover, the Army has
pressured to follow Dr. Compton’s advice, in view of the recent di-
rective issued by draft director General Hershey. For those t
action is the only sensible one to be taken.

It is with this aspect in mind that
the Institute may give a somewhat com-
parable issue in the Army. As the refor-
mation of our Institution, of its makeup,
and the problems it is required to face,
will be the central problem during the
next two years, the improvement of the
institute will be relatively small. It is these small improvements
that will be the key to the success of our
institute.

In the past six years, only three
students or over. Last year Alaska
had a quota that has varied
from one student to six students each year since 1937, thirteen from the
Philippines, and nine from India.

AN INTERESTING POINT

An interesting point of view with respect to these students is
that they are not members of the armed services. This is an
important point with respect to the fact that these students are
not only preparing for the Civil War, but are also preparing for
the post-war world. The Institute is well aware of the
situation and has made plans for this eventuality.

For the benefit of the students and for the benefit of the
Institute, the following facts are presented.

From a compilation of figures, put out by the student
registration office, it is discovered that the Institute enrolls
students from a number of countries. From these statistics it
is apparent that the Institute has a number of students from
countries outside the United States.
