Sophos Plan Class Meeting To Encourage

FRESHMAN TIE RULE

Under the leadership of their

president, the Sophomore Class, which

at time against the understanding when the dissolvement of the

Quadroon Club and the lack of interest of the

weather, have wrought. Plans

are now being made for a general class

meeting at 3:00 P.M. on Monday, this

week. It is definitely unannounced, but

hunting will be easier if it probably is used.

According to Trageser, the Sopho-

more officers have been confer-

ning some time about the situation, investigating the possibilities,

obtaining fresh ties or hats, and the advisability of compelling them

to be worn during the summer. The latest idea is for a fresh

every time, and the meeting is being called to determine just what the

class wants. That class does not

think such a meeting is needed, for

with the large number of agents of a petition which was circulated

regarding this matter. It was delivered to the Sophomore pres-

dent last week, but at that time the

Sophomore officers had already been

making plans, extentwise in the

majority of the class. Those plans include, besides the problem of ties,

or some identifying garment, the probable razzamatazization of the

disk club to enforce their wearing

rules.
