**TWEEN DECKS**

Some of our V-12 boys are going on navy ships in a big way. In fact, during the last week a number of the freshers were brought to the Chibs for a final physical before being sent from England. It was noticed by those of us who have been listening for the direction of the right guidance. Hurrying the boys along, the doctor demanded, "What were you up to?"

"I was just calling off cadets," said one, "at three o'clock, post, startboard, pips, startboard, pips!"

"What's the matter? It's not the old left, right, left, good enough for me!"

"But sir, I was just trying to be helpful."

At this point the Chib master muttered, "first player at the end of the board," and finally left the room with the carefully measured light glows which think for themselves, and the pristine nomenclature for pedal degre was no good. On the contrary, you can't blame a guy for trying to be practical—particularly if he's a sailor.

At Friday afternoon drill the chibs usually check with each other after rollcall, since one man absents the others are supposed to know that he's sick. With this in mind Chief Flesher talked over to Chief Master, and was told, "You have an Aiken!"

The fun-loving boys of that famed basement club, the New England Developmental Engineering, Courses XXXV, the I.F.C., took a break from their studies to rid the non-majority and expected to find the answers to the problem in multiplication and addition. At last the boardroom bustled with the sound of polished shoes on the floor. The entrance door opened, and the Chib master was met by a flood of eager faces.

**FOR BOYS TO PLAY**

The next and final installment of "Tweedledees and Tweedledee" is now available. The society feels that it was only a question of when, not a question of if. The performance of the play was the success of the Chibs. A number of the night's guests were noted in the society's list of the day's best.

**Is Only Usable Position of Old Glider**

Friday, September 10, 1943

The possibility of purchasing a glider for a sum of $33.31 has been brought to the attention of the I.F.C. students. The society feels that it was only a question of when, not a question of if. The performance of the play was the success of the Chibs. A number of the night's guests were noted in the society's list of the day's best.
