Cross-Country Meets Friday
V-12 Students Invited To Attend Meeting

The fall cross-country season will set in full motion at the meeting of the running team today at 6:00 P.M. in the Briggs Field House. Those interested in regular track training should, however, be present on the cross-country.

There is a feeling among the V-12 boys, that they are not included in activities limited to specific years. For such a feeling exists in the Regents and is entirely erroneous. The Navy does, in fact, urge its students to take part in all the Institute's sports. A special invitation for interested students is extended to all men to attend the meeting today at the Briggs Field House.

A tentative schedule has already been arranged to include meets at New Haven, Yale, and at distances from three and a half to four and a quarter miles, with Harvard, Dartmouth, and Smith. The board for the indoor track season is rapidly nearing completion on its new site outside the Briggs Field House.

The morning hiking section will meet at 6:00 A.M., on the center platform of the Massachusetts Avenue entrance to the Registrar Office, and will proceed to the Massachusetts Avenue entrance to the Regis Hall Library in the basement shelters, and then walk the other men to meet the buses of the 7:00 A.M. run. The meeting will be at 7:00 A.M., on the center platform of the Massachusetts Avenue entrance to the Registrar Office, and will proceed to the Registrar Office in the basement shelters, and then walk the other men to meet the buses of the 7:00 A.M. run.

The committee feels that there are important meeting and to choose transportation will cost about $.40; the loaning of bicycles from outside barriers must be taken in consideration.

New Air Raid Shelter Areas Located by Safety Committee

Professor Karl B. Millard, of the Department of Chemistry, Chief Engineer of the M.I.T. Safety Committee, announced yesterday that the committee has designated areas as shelters for Harvard students for air raid protection. The committee is extending its operation to include the new site outside the Briggs Field House.
