Member of Sigma Xi

Commander Hartog is a member of the American Society of Mechanical Engineers and past chairman of the applied mechanics division of that society. He is a

of the Institute of Aeronautical Engineers and of the Amer-

can Academy of Arts and Sciences. He also holds membership in the Society of Naval Engineers, Sigma Xi, and Tau Beta Pi.

Published every Friday during College Year, except during College Vacation. Entered as Second Class Matter at the Boston Post Office.

those who have not the opportunity to contribute can mail in a donation directly to the T.C.A. office. Solicitors will be present in the hall to receive contributions.

There are undoubtedly many who have nothing at all,

for service which the T.C.A. has rendered, this is gross ingratitude.

Distinguished Addition

We are possessed of little first hand information about the leading figures in the field of mechanical engineering, so that we are able to comment on the appointment of Den Hartog to the Institute Faculty only in the light of what has been told us.

Commander Hartog, is, we understand, counted among the top men in the profession. The authorities of the Institute are to be congratulated for their action in securing Commander Hartog as a Professor.

Commander Hartog will be a distinguished addition to a department already distinguished for its ability and regarded with pride by the students of Technology.

Three Boat Lengths

Saturday, five Tech crews will take to the river and attempt to leave fair Harvard in the wake. The Technology crews are good this year, and the chance of their walking into the show-

...that no wolves will be allowed at shows nightly, 7:30 and 11:30, and that there can't be any ofX the too crowded—it is really worth going on that evening.

To DEPARTING FRESHMEN

To those freshmen, who at the end of this term, will for

take the academic life of Technology and take up a new life

under an entirely different routine, we express the best wishes of their

students.

We hope those, who go at the end of this term, will for-

take the academic life of Technology and take up a new life

under an entirely different routine, we express the best wishes of their

students.

It is unfortunate that the preparation of these men for pro-

fessional work was interrupted; this is, however, only one of numerous consequences which inevitably follow from total war. We sincerely hope that each man who leaves the Institute this fall for induction into the armed services will return to M.I.T. after their work is done.

We wish them every success as they go to serve a nation which, though it shall have a great need in the future for them as engineers, has an equally great need in the present for them as soldiers, sailors, or marines.
