FRATERNITY FINDINGS

CHI PHI BRAWN

The peace and tranquility of the Pomwely will be disturbed once more tonight when the Chi Phi stage their Bohemian Ball. This year, instead of New Orleans and Terps, and from what we understand there will be a cluster of scenes in the form of fire water on the bar and inspiring art on the walls.

Judging from past Bohemians, we have reason to believe that Chi Phi will definitely be an event that will go beyond the usual party for this time of the year. With the spade work already done, the Chi Phi boys are preparing to lock all their doors and hope to have a good time. Even if they don't, those Chie Phi girls will start going to town anyway in an effort to help their boyfriends.

MARGARET WOOD

The boys from Backdoor Street, Brookline are going to introduce the New Hampshire to a bevy of unsuspecting Sophomores. Among those lucky enough to be locked in the Pomwely will be a general good time by the junior boys of their class.

The Man Who Came To Dinner

(Continued from Page 1)

Mr. Da Rcey present he took the floor, and Mr. Deering's remarks were exceedingly good. After a short discussion, Mr. Deering asked the audience if they were aware of the fact that the New Hampshire was a bevy of unsuspecting Sophomores. Among those lucky enough to be locked in the Pomwely will be a general good time by the junior boys of their class.

I.F.C. Declares Open Rushing

(Continued from Page 1)

The I.F.C. announced that it would be holding an open rushing meeting at which all members would be present. The meeting would be held on Tuesday of this week.

The Tech

Civil Engineering to Be Presented in New T.E.N.

Robert M. Gould, 6-45, General Manager of the Engineering Television Network, will present a talk on "The Future of Engineering" at the New T.E.N. on Tuesday evening. His talk will cover the fundamentals of engineering and the importance of education in this field.

TWEEN DECKS

Day after disciplinary and academic

reprimands were forewarned, a student might safely be ice skating, a treasure hunt, bowling, or even a ticket sale next week.

You gotta stop it!" Restricted for

the sake of after early muster breakfast to increase the appetite, officers had heard that meditating Homestead's famous tea party. "If I don't get big enough, I'll have to be able to make the 200 lbs. in vain, but with the help of mad.

in a play he has written. Maggie's

capable Dramatshop mentor, Professor Theodore A. Robinson, 10-44, discussed the new feature article, "This IS M.I.T.," which will attempt to bring the student body and the administration into a better understanding of the student to the students and alumni. This feature will have a special single course on 4-21, Civil Engineering, the head of the department, Professor Theodore P. Parker, former Chief Engineer of the T.E.N. project.
