TECH TOURNEY

Last week 71,000 fans, a great many of them high school students, flocked to the Boston Garden to root for their respective teams in the 19th Annual Tech Tourney, which has been directed through the years by Henry P. McCarthy, Physicial Institute Director, in cooperation with the M.I.T.A.A.

The tournament is completely non-profit, and today after 3,500 dollars has already been deposited in a safety fund, the excess is going to the high school principals for their disposition to benefit school children. It is needless to say that the tournament is a healthful outlet for the boundless energy of the school boys which has been diverted from the streets. I

This is the so-called "brownbagger" element, which finds no interest to look for any. It is

When Mr. McCarthy inaugurated this plan, he had no idea that the tourney would assume such proportions. The fact that it has grown is in no small way directly due to the "brownbaggers," but too much study is as bad as too little.

It is needless to say that the tournament is a healthful outlet for the boundless energy of the school boys which has been diverted from the streets. I

These smokers should be of the "brownbaggers," but too much study is as bad as too little.

“The hypothesis they present — that an activity would be detrimental to their studies—is fundamentally false. The relaxation alone afforded by half an hour's work participation will be far more than these same hours apportioned on a pile of books. Anyone who uses his brains as much as the average student does, will find that the "brownbaggers" would look for it and realize its benefits.

The nation-wide resources of the Bell System

The nation-wide resources of the Bell System are enlisted in maintaining dependable communication in war-born neighborhoods.

Many telephones—some even in outside hook locations—are serving residents in war-born neighborhoods. Many such telephones handle several hundred calls every month. It is a way more people can use the available facilities, limited now by wartime manpower requirements.

The nation-wide resources of the Bell System are enlisted in maintaining dependable communication services—vital in war, essential in peace.

Century of Photos Is Now Featured In Bldg. 10 Lobby

A collection of photographs, "One Hundred Years of Portraiture Photography," is now on exhibit in the lobby of Building 10. The collection is circulated by the Museum of Modern Art in New York City.

The collection features many famous and important figures included are Walt Whitman, Thomas Jefferson, Robert E. Lee, and General Grant. Literary figures include Walt Whitman and Gertrude Stein. There is also an outstanding four-color halftone photograph of George Bernard Shaw, as well as a striking photograph of Albert Einstein.

The oldest photograph in the collection was taken by David O. Hill between 1843 and 1844. This picture cannot compare with the others, but it offers an excellent example of the early years of portrait photography during the last century.

Proxies Approved For Inst. Comm.

Proxy Report for Activities Open House Given (Continued from Page 1)

H. Bruce Pitney, 16-44, Robert A. Frankel, 6-45, and Herbert A. Frankel, 6-45, were made up with the recommendations of the Institute Committee, which authorized the student, and a majority of the members of the Comm. Committee, to a large extent not yet determined.

Proxies Approved

A motion was seconded and passed to allow the executive committee of any activity whose Institute Committee representative was unable to attend meetings because of commitments to classes with applying a miss-meeting pass for the term. The miss-meeting pass was given for the election of position only by men who could not attend meetings because of conflicts with athletics.
