LEUTENANT CRAIG ENJOYING V-12 SMOKER

LEUTENANT F. Y. CRAIG, U.S.N.R., is seen at the V-12 Smoker held last Friday.

The V-12 T.E.N., held Monday afternoon at 4:30 P.M. in M.I.T. Dining Rooms, provided a means of importance of Buckman and later life. After the meeting, refreshments were served and an informal discussion of T.E.N. was enjoyed.

A welcome was extended to all prospective members by the Officers, Mr. Robert M. O'Connor, 9-44. He described T.E.N. briefly and introduced the officers of the organization.

Professor Magnus described the investigations into the relative standings of various technical and engineering students, who have gone in this country, both academically and also with regard to outside activities. He found that of the people who achieved the fastest, 15 per cent came from the top two percent from their class and 20 per cent from the bottom ten. He pointed out that those in the lower tenth that arrived averaged 50 academic units but were interested in other activities, such as politics, and through these they received a much broader education than those devoted only to their studies.

At the end of the meeting, those interested were given informally information by the staff members about the publication.

5-15 CLUB

This evening at 9:30 P.M. the 5-15 Club held its smokes in the 5-15 Clubroom. The meeting is planned to last about a half hour, and during which time refreshments will be served. The functions of the club, athletics, and entertainment will be presented in detail.

ROCKET SOCIETY

In a smoker held last Monday evening the future plans of the Rocket Society were discussed by the president, John Cook, including the rocket meetings to be held in the future.

The Technology Rocket Society has written the American Rocket Society concerning the publication of their papers by the latter and the club expressed hope that they will be republished. In line with the recent interest in newspapers, the society has obtained several Boston American Society books on the subject.

SPEER SPEED

The Speed Ray Balls Fast Movements

(Continued from Page 1)

The Speed Ray Balls are used by Olin Mills in his "Million-

miles per hour to date. They are supplied in a variety of colors and are made in sizes from 1" to 3" in diameter.

Eisen is not the worst in the world.

While the near to the rear of the room and his terrific band will conciliate Monday, April 2 at Symphony Hall.
