Letters to the Editor

Daniel J. Fink, '48
Student-Faculty Committee

Dear Sir:

It is with great surprise to me to read two letters published in this paper critical of the Student-Faculty Committee. The committee has had such a politically partisan management. The first letter could have been written as an appearance of fairness toward the group. It is true that the committee has made a public appeal to the voters on the issue of their support by the major political parties. Such a position is questionable terminology, as "waving the flag" means the committee is supporting one political party against the other. The second letter appears to be a personal attack on an individual who understands only the language of power.

Technological Surveys Transportation Interview Owners of Ancient Autos

Dear Sir:

Five years of war have created a transportation problem in which the nation and technology is no longer directly involved. However, in the future, a new generation of students will face the same problems that we are now facing. It is important for us to learn from those who have experienced these problems and set out to interview the owners.

Don't Keep It To Yourself

Last week, at the regular meeting of the Institute Committee, plans were formulated for the reorganization of the Student-Faculty Committee. Several suggestions were made which will enhance the efficiency and effectiveness of the committee in the future.

This committee is set up for the express purpose of airing the students' grievances to the Institute for the faculty. In the past, the Student-Faculty Committee has been quite successful on a limited scale. In the future, we hope that more students will participate in these meetings. After all, the organization was created as a service to the students, and consequently its success depends upon how many students use it.

The limited amount of Technicians utilizing the committee in the past can be attributed to a general lack of knowledge and interest in the committee. The committee now aims to overcome this problem by keeping the student informed on its activities. We, therefore, urge any man who has any problems concerning the Institute or any suggestions for improvements in policy to take them to the Student-Faculty Committee, in the Walker Memorial Committee office. That's what they're for.

Man About Tech

The convention exercises have recently been in full swing and we at a tale of we heard of a similar exercise at duke university some time ago. It seems that the chaplain who was present to deliver the main address started his skit by taking the letter the, which had been given on the previous day for money. The skit was a full hour and a half and the audience was unimpressed by the performance.

Next, the preacher took the letter to and proceeded to discuss it with the congregation. The audience expressed interest in the skit, which had been prepared by the owner of the Stanley Steamer. It was claimed that the Dodge has greater value than a 1947 Studebaker. The audience was unimpressed by the performance.

As last the clergyman finished his, and the liberally educated, emphasized the ecological efficiencies of the Chrysler, and mentioned that he is the owner of the Stanley Steamer. It was claimed that the Dodge has greater value than a 1947 Studebaker. The audience was unimpressed by the performance.

CUT OUT NICOTINE

Now that the valiant crimson oftu runs, a new idea in tobacco products has been presented. The "mechanical" cigarettes, invented by a New York cab driver, are advertised as having many advantages over the usual tobacco products.

They have a transparent filter, which allows the user to see how much tobacco is being smoked. They also have a new type of smoke, which is less offensive to the nose.

The "mechanical" cigarettes are now available at all leading tobacco stores. They are advertised as being a new idea in tobacco products and are gaining in popularity. The "mechanical" cigarettes are advertised as being a new idea in tobacco products and are gaining in popularity.
