Building and Construction

(caption from page 2)
central urban area in the city. The area was divided into two options. Light Construction and Heavy Construction.

Both have the same basic work during the first two years and begins to be divided different only in the third year. In the Light Construction Option emphasis is placed upon the advanced techniques of building small buildings such as design, structural analysis, and pedestrian upon shop procedures, modular design, the effect of building notes and other legal restrictions upon this type of construction, and the problems associated with mass production of buildings in this field.

The Light Construction Option furthermore emphasizes the business side of construction, including the business organization and management of a construction firm. (Continued on page 4)

Marine Transportation

(caption from page 2)
in shipyard, the students are taught to design and construct a ship in labor conditions in their own way. Probably more graduates of the course at the present time are employed in the various specific aspects of ship operation than in the purely engineering side. However, a basic technical education is necessary and certain principles must be acquired as those for the purely engineering branches of a company.

today is generally considered essential before a man takes the place on the shops of a shipyard company that he spent one time as an historian. At this time, therefore, the focus of this five year course in that company is the training they need to spend their fourth year at sea on a merchant ship. This is achieved by the cooperation of a number of personnel factors. The years on shipboard give the student an opportunity to understand some of the problems he will face in personnel and personnel labor. To observe the behavior of ship's personnel with their power plants, to acquire first-hand information about their duties, and then to handle and store of ships' equipment. A map located on the record.

The course in Marine Transportation serves not only to train men for positions in the field of Marine Transportation, but provides an excellent background for professions associated activities, including various national departments, marines, and preliminary training for admiralty law.

THREE IMPORTANT FACTS FOR PUPILS

STUDENTS

ATTENTION! If it's recorded-We May Have It

Lamps $7, Rockers $6, Chests $5, Lounge Rockers $6, End Tables $3, Platform Beds $15, many other household needs.

Pay & Take Furniture Co.

555 W. Boylston St.
No. Cambridge, Mass. 49, III.
Open Weekday, 9 to 9.
