A VOTE OF THANKS

The efficiency and ease with which the Tech

COOP handled the large number of sales in

the present two-week period, in my opinion, was a cheerful note on the hectic first

few weeks of a new term.

Considering the relatively small size of the

store, which caters to the veteran-weeked student body, it is a remarkable fact that remarkably good service was rendered. On February 10th, for

example, when two buses were blocked through at the rate of 120 per hour which is a good 50% over our usual rate, caused by veterans using time-consuming government forms for their purchases.

Along with several lines, we have been pleased to note the expanding variety of arti-

cles carried by the COOP. To date, the main store on Harvard Square. With little

frustration, the shop has increased in efficiency, and it has become convenient for the students to buy clothing articles and necessities of all sorts, where a good selection is available. By the way, a department store is being considered by the committee, with Mr. Arthur West, store manager, who has been associated with the COOP for twenty years or so.

To the Editor of the Tech:

Your editorial of February 14th, points very clearly to the necessity of having many of the so-called "liberals" in this campus.

The student is, of course, (on both or one side) a minority in this University, and you regard

communists activities here as only of nuisance value. You observed, however, that

people are already mentioned, the student and dangers of Communism, is the gravest mistake

that this Editorial Committee could ever make.

Acceptance of support, even for a worthwhile cause, does not alter the fact that com-

mittees of the A. Y. D., will only endanger the cause of the student in this country.

Long live democracy.

Lott A. Zaden

In the edition of January 24, 1947, an editorial appeared, all purporting to reveal

nothing could be farther from truth. Having ob-

served the somewhat well-known facts, any

measure of the cause of the student in this country.

The report has been coming for a long time.

The sports setup at Technology was some-

thing less than perfect for this purpose.

The fact was that all parties con-

sidered their interests in improving the status

of athletics. For this purpose are more often

eagerly received by the members of the Study Committee's findings.

The administration is especially to be

commended for waiting to act before

finally giving in to the demands of the students.

The committee feels that an or-

neering the report, thus showing
