Dr. Compton Given M. Hartley Medal

Awarded on Tuesday By Nat. Acad. of Sciences

The Manositol Hartley medal for "merit in the application of science in public welfare" was awarded to Dr. Karl D. Compton on Tuesday, November 18, by the National Academy of Sciences.

In making the award the Academy stated that Dr. Compton has been named as the winner for 1947 "because of his notable contributions of an original character to the science of physics, his long and valuable career in the field of education and university administration, and in recognition of his eminent service in the wartime research effort of the nation, and in the rendering of collaborative understanding and assistance to civil scientists and military men."

During the war Dr. Compton served as chief of Field service in the Office of Scientific Research and Development.

Frost
