Chi Epsilon Holds Initiation Banquet

The Initiation Banquet for new members of Chi Epsilon, the honorary civil engineering fraternity, was held Wednesday, January 17, in Branches 1 and 2 of the Union, with the guest speaker being the architect of Harvard Square. After the meal, Dr. Paul E. Morris addressed the members.

Chi Epsilon is composed of members of the civil engineering staff at Harvard as well as alumni and faculty members. It was founded in 1912 and is one of the largest engineering fraternities in the country.

Romano Falls Days Behold As Frosh Plot Changes Date

If freshmen Ralph Romano comes up to you and asks you what day it is, you'd better get used to the idea that his room mates of 5K in building 2 are the ones who control his behavior. This is the advantage of his sleeping characteris-
tics again.

It was during that Ralph decided to take a little nap around four o'clock this morning that his room mates upset him and his friends. Ralph was almost all napped into bed. After setting back clocks and making other prepara-
tions, the frosh were left to drive around, deeply surrounding people in the hall, and high time to get up. Ralph was roughly aroused from his best and informed that if he wished to get to English, he had better get going. Ralph was not so protester like being said to have overslept on the morning. He talked the clock in the barracks.

Unfortunately for Ralph, however, there was no reason. Ralph was quoted in a statement after he woke up to reality—far into the evening.

Ralph was informed that his room mates, who had been sleeping, had already left for the day. Ralph was told that he had slept for 24 hours. It wasn't until he glanced at the calendar that he realized he was up too late for the following day. Ralph woke up to reality—far into the evening.

This year the situation has changed. The Alumni Advisory Council on Athletics, in addition to the pro-

mis of political and character, to express his political views.

Several other editors with a political slant have appeared during the year. In other words, the editor of T.E.N., thinks that there should be absolute free speech for those who agree with him, and some restraint on those who disagree. That sounds like opposition to the right of free speech if we over hear it!

The real issue, however, is not what T.E.N. said editorially, but whether or not the editor should use that magazine, which is essentially non-political in character, to express his political views.

We must be particularly impressed with T.E.N.'s thought on the subject of free speech. The magazine is not a political one, and the editor's views should be expressed in a different way.

Baseball

Last year there was considerable agitation by a group of students for the formation of a varsity baseball squad. At that time the suggestion did not meet with the support of the Alumni Advisory Council on Athletics. In addition, the pro-

mission of the new Atlantic gives great promise of providing forthright and interested thinking as regards new problems in the sport. The committee's report is as follows:

Review: "the new Board will broaden the range of interests and responsibilities in the guidance of M.I.T. athletics.

The committee feels that the new Board will broaden the range of interests and responsibilities in the guidance of M.I.T. athletics.
