of the group policy are tabulated, and the excess of annual premium over the operating cost is refunded. In 1974, at the time of the 25th reunion, the individual may continue the policy and accept the dividends themselves from then on, or he may drop the policy and accept the cash surrender value, which is $38. Since the individual has paid in cash a total of $46.50 at that time, if he elects to turn his policy in and accept the cash, he will have had $1,000 insurance protection for a period of 25 years at a cost of $98, or less than $6 per year.

Aiming at $10,000

According to Toohy, the senior class is aiming at $10,000 for their gift. This is possible under the proposed scheme if nearly all of the class participate. The annual premium of the group policy are tabulated, and the excess of annual premium over the operating cost is refunded.
