Air Force Seeks Recruits At Tech

Opportunities for a career as an officer with the United States Air Force will be explained to interested men at the Institute on February 14, 15, and 16 by a special Air Force Aviation Cadet Team, Lt. Col. Robert E. Corr, First Air Force Aviation Cadet (Procurement Officer, announced recently. The talks will be held in Room 7-104.

On February 14, 15, and 16, The Aviation Cadet Team will administer, mandatory study in electrical utilities industry. Successful candidates will then be chosen after physical examination and complete an interview on a later date. Men accepted will receive basic flight training at various fields in Texas. Successful Cadets will be given their wings and commissions as Second Lieutenants in the Air Force Reserve after not more than twelve months training. They will go on active duty immediately upon graduation and can earn pay and allowances in excess of $4000 a year.

**Occupation**

Aircraft Energy

The development of atomic energy plants to produce electricity is not expected to influence the industry during the next ten to twenty years. Even when such plants are put into use, they are not expected to have much effect on employment, as they involve primarily substitution of atomic energy for other fuels.

**Hydrolab**

Dynamics a field of great industrial and engineering significance. At the present time there is a scarcity of such qualified personnel and work in the field of hydrometrical research, the area in which nuclear plants can be accommodated. Storage tanks for 15,000 cubic feet of water will be needed for the laboratory's requirements.

**Smoke a LUCKY to feel your LEVEL best!**

Luckies' fine tobacco picks you up when you're low... calms you down when you're tense!

Luckies' fine tobacco puts you on the right level—the Lucky level—to feel your level best, do your level best.

That's why it's important to remember that Luckies have More Pure Tobacco—mild, ripe, light tobacco that makes a thoroughly enjoyable smoke. No wonder more independent tobacco experts—sellers, buyers, and warehouses—smoke Luckies Field Stripes rather than smoke the next two leading brands combined.

Light up a Lucky! Luckies' fine tobacco picks you up when you're low, calms you down when you're tense. So get on the Lucky level where it's fun to be alive. Get a cotate and get started today!

**Thieves Loot Co-op Of 4000 Dollars In One Ton Safe**

Robbery Still Unsolved

By Police Department

After Nearly 2 Weeks

During the week of February 29, a group of thieves, seizing the opportunity of our mid-year vacation, opened the safe of the Cambridge Co-op, containing $2000 and $4000. According to the Cambridge Police Department, a duplicate key to the outer set of doors of the Co-op enabled the unknown man to enter the vault of the store. Once inside the vestibule, he broke the pane of the door and then proceeded to the cashier's counter where there was kept the key way inside the cage, thus gaining access to the safe. The safe was broken into, and the money taken through the side exit on Amherst Street.

Precisely what the bandits did with this massive strong box, weighing more than two thousand pounds, and how they successfully maneuvered it from the Co-op still remains a mystery to the authorities. If any recent progress has been made by the Cambridge Police Department, they are keeping it confidential.

**Convection**

(Mentioned on Page 1)

M.I.T. and Chairman of the Research and Development Board of the National Military Establishment, will sound the keynote of the convocation in an address on "The State of Science." In the evening there will be a general conversation on the subject, "The Twentieth Century, Its Problems and Its Potential." The program on Friday, April 1, the second day of the convocation, will consist of a panel discussion, the first of which will consider "Men Against Nature... the Problem of World Production." The second, on Friday afternoon, will consider "Men Against Men... the Problem of the Underdeveloped Areas." There will be two talks on spiritual questions, the first "Science, Materialism, and the Human Spirit," and the second "The Role of the Individual in a World of Institutions."
