**THE TECH**

**Reviews & Previews**

It is too bad that so few students take much of an interest in the Flying Club over the weekends. For the most part, it is their own loss. Last Friday and Saturday, for instance, the Staff Players performance was attended by large numbers of faculty and administration members, and small numbers of students.

We can only say that anyone who watched this last performance of Mr. J. F. Prudden’s “Laboratory” without good reason that is, without legitimate school off days, should have attended. Next week’s program will be a play, “A Day at the Race” and the 1928 birthday cake. The birthday cake was a gift from the honor of the fiftieth anniversary of the Staff Players. The birthday cake will be served free to the whole campus.

**Excellent Acting**

No one would deny that the players are no assets and that their weakness was in the proper presentation of the play. On the other hand, the quality of the acting was excellent; we have seen much less convincing performances from far more prepared groups. Students who actually looked their parts, actors who really looked their parts, and actors who really looked their parts. Students who really looked their parts were chosen by the group. The young actors were chosen by the group. The young actors were chosen by the group.

**Outside Reading**

The companies and organizations are Pressure-Proofed* which means that, for instance, the Arrow Safety Device Co., Mount Sinai, New Jersey; the American Pencil Co., Hoboken, N. J.; the Humble Oil Co., Houston, Texas; the Hughes Aircraft Co., Culver City, California; the Hood Rubber Co., Watertown, Mass.; the Ford Instrument Co., Long Island Experimental Towing Tank, Hoboken, N. J.; the Arrow Safety Device Co., Mount Sinai, New Jersey; the American Pencil Co., Hoboken, N. J.
