Trek from Ye Olde Institution Ends in Engineered Revolution

Seniors Launch 25-Year Plan

Insurance Dividends Finance Future Gift

Last January the Class of 1948, through the offices of the Trustee and the Student Body, decided to purchase a 25-year gift to the Institute. The plan works as follows: Each individual takes out an insurance policy of one thousand dollars and names anyone he wishes as beneficiary. However, the annual dividends would be payable to the Class of 1948 25-Year Gift Fund, to be accumulated in interest until the 25th reunion. At this time the class will present the dividends to the Institute in whatever form it chooses. In case of the death of the individual, $1,000 would be payable to his beneficiary.

The campaign is being started this year since past plans have been more successful if launched while the men are still at Tech. Another point: premium cost per annum is $1.25 for a 25-year-old alumni, whereas Tech would be older for an equal sum.

The class committee is working in close cooperation with E. Lester Goodrich, who handles many of the Institute’s Insurance Plans. The headquarters of the class is set up in the student center, and the secretary will be open from 9:00 a.m. to 5:00 p.m. and will have all the information concerning the plan available for each member of the class, and all are invited to drop in at the office.
