Crews Meet Harvard, Rutgers, Princeton Tomorrow On Charles In Annual Compton Cup Regatta

New Dormitory

By Fred Vanderlande

A curious rumor that Dean Wurster of the Architectural Department could be present in the building this weekend was passed on to the students. When asked whether or not he would be visiting the new dormitory, he replied, "I think that we would miss it quite a bit."

"There will be seven couples at each floor," Dean Wurster later added. "Prom will be on sale beginning Monday; along with a desire to find out just how the new buildings of Technology stacked up in general, architecturally speaking.

Of New Dormitory

Dean Wurster talked with Professor Lawrence A. Anderson, architect of the new dormitory, for quite a while, and came away with a pretty good idea of our new facilities. To regard to the Dome, we could just see the Dean in admission. It might look better with it off, but we think that we would miss it. We shall show you what it would look like with it off, but we hope that we would miss it."

"We have endeavored to do, not by the architect, but just with a little skill, photography, and the recital is the only thing that it has,-AVaray Arliss, head of the design of this building, particularly wished to avoid "store architecture": i.e., a sleek, architectonic artist's conception, in the structure, Dean Wurster very emphatically. The window-frames are slightly projecting bricks, and the rough surfaces of the bricks would provide an interesting play of light and shadow to relieve the monotony of the surface. The lights have also been carefully taken into consideration in the designing of the pavilion, according to the Dean. Here, the port-hole-like structures in the roof would provide a flood of illumination without excessive light in the rooms to the direct sun; the dining room would actually appear to be floating in "light.

"Beetle Trap"

This year's Interfraternity Conference Dance will feature Skip Towne and Monica Lewis. The dance is scheduled for May 6, at 9:00 p.m. in the Hotel Butler lasting till 1:00 a.m. on Saturday morning. On Saturday afternoon there will be a cocktail party at Chi Psi, Delta Tau Delta, Eagles, Deltas, Nu. In the evening cousins parties will be held at the houses; the Delta Kappa Epsilon house will have a Gay Starlight party, the Beta Theta Pi house will have a Skip Wreck party, the Delta Kappa Epsilon house a Gay Nineties party, and the Theta Chi house a Workingman's Friday evening, by the members with the different departments of the T.C.A., to clearly outline the functions of the T.C.A., and to explain the T.C.A. to the groups of the other departments.

The committee has consisted of junior members with the different departments of the T.C.A., to clearly outline the functions of the T.C.A., and to explain the T.C.A. to the groups of the other departments.

"It is expected that five hundred couples will attend the dance, and there will be a cocktail hour in the events of the I.F.C. week-end.

Exterior Of New Library

To Get Steams, Acid Bath

With exterior work on the north wing of the new library completed, most of the students have been employed in cleaning the windows and glass panels as they new stand. The principal is a call for a systematic cleaning of the building.

Morgan, nationally known beauty photographer and many others.

Beauty Queen Programmed

By Murray Kordan

Yesterday morning, Murray Kordan, Moongle, an employee of the Grace Downs Model agency; Murray Kordan, was engaged to consult with Al Capp, creator of the comic strip, "Li'l Abner," in the design of the Grace Downs Model agency; Murray Kordan, beauty contest, as the former Miss America, for the upcoming contest. The contest will take place during the spring semester, with the actual contest being held on May 6.

T.C.A. Confers

By Department Talks

T.C.A.'s annual retreat was held at the Tech House on the Round Hill estate and the part it played during the retreat. The purpose of the meeting was to acquaint the members with the different departments of the T.C.A., and to explain the T.C.A. to the groups of the other departments.

Grades, Early Triumphs

Miss Technology was born in the little town of T. C. A. years ago. Perhaps an indication of the height she would one day reach can be seen in the "Miss Atlantic City, 1930" for being the "sexiest baby on the boardwalk."

When asked why she was not an engineer, the reply given was, "I was born with a silver knife rule in my mouth."

Always noted in figures, she was an outstanding student of mathematics in grammar school, and graduated from the sixth grade at the age of 15. Her hair is, a fast pitch at Lackawanna, and personal friend of Dr. V. R. Nih, put her to work designing a calculating machine.

In her junior year in high school, she received the BS degree for work in advanced mathematics, she entered Technology in the fall of 48.

Six Sophomores, 2 Juniors To Start For Tech Varsity

Tomorrow afternoon will see the opening of the 1949 intercollegiate regatta on the Charles River, when Technology will take on the crews from Harvard, Princeton, and Rutgers. The regatta is sponsored by the annual Compton Cup Regatta.

Trimble to Stroke for Tech

Coach Jim McMillin's varsity coaching job this spring, and two juniors, who will create a stir in the Regatta, were particularly interested in finding out just how the new buildings of Technology stacked up in general, architecturally speaking.

The 1949 regatta will be held at Harvard, in the little town of New York, 18 years from April 1931. When asked why he was not an engineer, the reply given was, "I was born with a silver knife rule in my mouth."
