George Underwood completing the shell. Don McGuire will con this event. Big Jim’s only comment was that… they’ll be tougher this week.”

The only bright note in last week’s activities, as far as the technical world was concerned, was the excellent showing of the freshman Magoun, who was an outstanding student, although losing a boat length at the outset because of an unhappy start, caused by the wind and the officials, fought back gamely, and were just nipped at the finish by the Harvard shell. The boys are confident they will douse Harvard this weekend.

The heavyweight crew races, the lightweight crews and Harvard and Technology will hook up in a rematch of last week’s races which were cancelled because of darkness.

Schedule of Events

Lightweight Races against Harvard—Freshman, 3:30; Jayvee, 3:30; Varsity, 4:30.

Heavyweight Races against Harvard and B. U.—Freshman, 4:30; Jayvee, 5:30; Varsity, 5:30.

great contributions towards making the students in this school not only good scientists and technologists but also good citizens.”

Professor Edward R. Schwartz, in charge of the textile division stated that Prof. Magoun had made many contributions during the war towards emphasizing greater safety in industrial groups. Much of this material is now being used in courses of safety of all kinds. As well, Schwartz said, he had been much impressed with his counseling of students, and referred to Magoun’s work very successful industrial consulting, for manage- ment-labor relations and personnel work. Professor Schwartz concluded by stating that the relations between the division and Magoun’s had always been the best.
